Contents

Section 1

1 History of strabismus surgery, 1

2 Surgical anatomy, 15

Overview, 15
Palpebral fissure size, 15
Extraocular muscle size, 16
Pulleys, 18
Palpebral fissure shape, 21
Epicanthal folds, 22
Conjunctiva, 23
Tenon's capsule, 24
Surgical anatomy of the rectus muscles, 28
Characteristics of the extraocular muscles, 31
Motor physiology, 31
Underaction and "overaction", 34
Surgical anatomy of the inferior oblique, 35
Lockwood's ligament, 37
Superior oblique, 38
Whitnall's ligament, 41
Trochlea, 42
Anterior segment blood supply, 48
Vortex veins, 51
Orbit and extraocular muscle imaging, 52
Growth of eye from birth through childhood, 54
Sclera, 56

3 Parasurgical procedures and preparation, 59

Overview, 59
Physical examination, 60
Consent for strabismus surgery, 60
Instruments used in strabismus surgery, 63
Sutures and needles for strabismus surgery, 64
Anesthesia for strabismus surgery, 67
Preparation of the patient in the operating room, 70
Layout of the operating room and anesthetic apparatus, 72
Patient monitoring, 73
Magnification in strabismus surgery, 74
Wearing a mask, 74
Outpatient surgery: the day of surgery, 75
Postoperative care of the patient, 76

Section 2

4 Work-up of the strabismus patient, 79

Design of the surgical procedure, 79
Step 1: Patient evaluation, 81
Diagnostic considerations for strabismus with restrictions, 90
Differential intraocular pressure test, 98
Step 2: Results to be expected from surgery, 108
Summary of steps 1 & 2 in the design of strabismus surgery, 117
Step 3: Guidelines for application of surgical options, 117
Step 4: Surgical technique, 117
Step 5: Follow-up of the surgical patient, 120

5 Diagnostic categories and classifications of strabismus, 123

Congenital esotropia, 125
Intermittent exotropia, 142
Brown syndrome, 147
Duane syndrome, 149
Superior oblique palsy, 151

Scanned with OKEN Scanner

Section 3

6 Mechanics of surgery, 163

Techniques of exposure, 163
Limbal incision, 171
Incisions for exposing the obliques, 174
Obtaining improved exposure, 175
Cuffed superior limbal incision, 176

7 Recession of a rectus muscle, 177

Overview, 177
Excessive recession, 177
Recessions measured from?, 178
Medial rectus recession, 179
Lateral rectus recession, 181
Superior rectus recession, 182
Inferior rectus recession, 184
Rectus muscle recession technique, 186
Variations in suture and needle placement, 188
Vertical displacement of the horizontal rectus, 190
Resection effect of suture placement posterior to the muscle hook, 192
Hang-back recession, 193
Partial disinsertion, 194
Recession of a rectus muscle with sparing of the anterior arteries, 194
Slanted recession, 196
'Y' split of the lateral rectus, 197

8 Resection of a rectus muscle, 199

Overview, 199
Horizontal rectus resection (medial and lateral rectus muscles), 199
Management of the intermuscular membrane in horizontal rectus resection, 200
Resection clamp technique for rectus muscle resection, 201
Double-arm suture technique for rectus muscle resection, 205
Resection of the superior rectus, 206
Inferior rectus resection technique, 207
Tandem suture technique for rectus muscle resection, 208
Plication (tuck) of a rectus muscle, 210
Displacement of horizontal rectus muscles with resection for 'A' and 'V' patterns, 211
Vertical effect from horizontal rectus resection and recession, 212

9 Surgery of the obliques, 215

Oblique muscle surgery, 215
Weakening the inferior oblique, 216
Strengthening the inferior oblique, 225
Strengthening the superior oblique, 235

10 Marginal myotomy: technique and indications, 241

Historical review, 241
Quantifying the marginal myotomy, 242
Technique for a 'double 80%' marginal myotomy, 244
Indications for a marginal myotomy, 245
Other considerations, 248

11 Faden operation (posterior fixation suture), 247

Posterior fixation suture (retroequatorial myopexy, faden operation), 247
Placement of a posterior fixation suture after detaching the muscle, 251
Placement of a posterior fixation suture without detaching the muscle, 251
"Reinforced" posterior fixation suture, 252
Combined posterior fixation and recession, 252
Adjustable "faden", 252

12 Adjustable sutures: techniques for restriction, 255

Overview, 255
Technique for the adjustable suture, 255
Tandem adjustable suture, 259
Adjustable suture considerations, 260
Conjunctival recession, 261
Traction sutures, 263

13 Muscle transposition procedures, 265

Overview, 265
A review of muscle transposition procedures, 265
Rectus muscle transfer, 268
Scleral augmented muscle-tendon transfer, 270
Knapp procedure, 272
Superior oblique tendon transfer, 273
Transposition for head tilt without oblique muscle dysfunction, 274

Scanned with OKEN Scanner

Botox (Botulinum A-toxin), 275

Overview, 275
The drug, 275
Indications for Botox, 276
Use of Botox in treatment of strabismus, 276
Retrobulbar Botox for treatment of nystagmus, 277
Botox for treatment of benign essential blepharospasm, 277
Technique of injection, 277
Botox for the treatment of blepharospasm, 281
Injection techniques for blepharospasm and facial spasm, 281

Section 4

15 Telemedicine: distance medicine, 285

Real time vs. store and forward, 285
Moving or still, 285
Image size, 285
Computer, 286
Start of Cyber-Sight, 286
Telemedicine consultation cases, 292

16 Strabismus case management, 359

17 Complications in strabismus surgery, 455

Complications of strabismus surgery?, 455
Criteria for success after strabismus surgery, 455
Informed consent, 457
Diplopia, 457
Reoperation, 458
Loss of vision, 458
Postoperative nausea and vomiting, 458
Acute, allergic suture reaction, 459
Chronic suture granuloma, 460
Reaction to synthetic absorbable suture, 460
Subconjunctival cysts, 460
Prolapse of Tenon's capsule, 462
Suture abscess, 463
Delle, 463
Lid fissure anomalies, 464
Ptosis of the upper lid, 465
Scleral perforation, 465
Slipped or lost muscle, 466
Anterior segment ischemia, 469
Persistent overaction of the inferior oblique muscle, 470
Inferior oblique adherence syndrome, 470
Inclusion of the inferior oblique in the lateral rectus insertion, 471
Muscle-tendon rupture, 472
Hyphema, 472
Posterior chamber hemorrhage, 473
Motility disturbance after nonmotility procedures, 473
Postoperative Brown syndrome, 473
Symblepharon, 474
Orbital hemorrhage, 475
Orbital cellulitis, 476
Endophthalmitis, 476
Postoperative communication, 477
Operation on the wrong muscle, 477
A homily, 477
Operation on the wrong patient, 477
Undesirable overcorrections and undercorrections, 478

Reading list, 479

Index, 495
