Contents

1. The IVF Laboratory: A Historical Perspective 1
Peter Svalander, Michael Tucker
The Pioneers and the Development of Cell Culture Techniques 1
What is an IVF Laboratory? 2
The Early IVF Lab 3
An IVF Industry Emerged 4
Regulatory Developments in IVF 8
The IVF Laboratory Staff 10

2. What Makes an IVF Laboratory Successful? 13
Alpesh Doshi, Sandeep Karunakaran, Kathryn C Worrilow, Alex C Varghese
The People of ART 13
Equipment and Consumables 17
Processes and Procedures 20

3. Establishment of an ART Clinic: Location, Construction and Design 24
Lars Johansson
Location 24
Facility Properties and Qualities 24
Final Remarks 28

4. IVF Culture Systems: An Overview 31
Lyndsey Zujovic
Incubators 31
Workstations 35
Microscopes 37
Micromanipulators 38
Other Equipment 40
Plastics, Gases and Culture Media 41

5. Air Quality Control in Reproductive Laboratories 45
Sandro C Esteves, Fabiola C Bento
Control of Particles 45
Control of Volatile Organic Compounds 46
How to Design and Implement Reproductive Laboratory Facilities with Air Quality Control? 46

6. Designing and Operating Cryopreservation Facilities 54
Gábor Vajta, Anikó Reichart
General Remarks 55
Cryostorage Room 55
Equipment for Cryostorage 56
Workplace for Vitrification: The Changing Role of Cryopreservation 57
Equipment and Tools for Vitrification and Warming 58
General Suggestions for Vitrification Work 59

7. Factors to Consider When Setting Up a PGD Laboratory 61
Walid E Maalouf
Methods of Embryo Biopsy 62
The Embryology Laboratory 63
Stage of Embryo Biopsy 63
The Screening or Diagnosis in the Genetics Laboratory 64
Counseling 65
Trained Staff 65
Quality Control (QC) and Quality Assurance (QA) 65
Accreditation 66

8. Facilities and Resources for the Andrology Service 69
Mathew J Tomlinson, Stephen J Harbottle
Process and Workflow Planning 70
Essential Facilities 71
Planning, Design and Construction 71
Equipment for Andrology 72
Cryopreservation (Facilities and Equipment) 76
Facilities for Specimen Production 81
Storage 82
IT Infrastructure 82
Validation and Commissioning 84

9. Quality Management 87
Julius Hreinsson
The Strategic Importance of Quality Management 87
Quality Management System Requirements 88
Quality Assurance 90
Quality Control 92
Evaluation of Suppliers and Goods and Services 92
Continuous Improvement 93

10. Practices and Principles and their Impact on the Function of the Laboratory 94
Peter Sjöblom
Quality Management Principles 94

11. Micromanipulation Systems and Operations in an IVF 106
Thomas Ebner
Micromanipulation Systems 106
Intracytoplasmic Sperm Injection 107

12. Morphological Embryo Assessment and Embryo Selection 117
Inge Agerholm, Søren Ziebe
Assessment of Embryo Development 117
Developmental Rate, Even Cell Numbers and Synchrony 118
Assessment of the Embryo Morphology 120
Kinetic and Dynamics of Embryo Development 125
Factors Influencing the Cleavage Timing 125
Standardization of Morphological Assessment for Embryo Grading System 125

13. Adaptation of a Universal Procedure for Cryopreservation of Different Developmental Stages: Is it Conceivable? 131
P Vanderzwalmen, F Ectors, B Wirtleitner, L Grobet, B Lejeune, F Puissant, A Stecher, I Uranga, S Vanderzwalmen, Y Prapas, N Zech
Evolution Towards a Universal Vitrification: Is it Conceivable? 132
Extrinsic Factors: Impact of Closed Aseptic Carrier Devices in Vitrification 136
Vitrification in Hermetically Closed Device: Steps, Principle and Methodology 137
Clinical Application of Vitrification in Closed Devices 142
Discussion 142

14. Semen Analysis Based on New WHO Standards and Interpretation of Results 147
TF Kruger
The New WHO 2010 Semen Threshold Values 147
What are the Basis for the Suggested Values 147
Other Proof Assisting the Suggested Threshold Values 147

15. Sperm Processing and Selection Techniques in an IVF/ICSI 151
Bhushan K Gangrade, Ashok Agarwal
Sperm-wash Media 152
Ejaculated Sperm 152
Patient Preparation 152
Retrograde Ejaculation 156
Procedure for Isolation of Spermatozoa from the Urine of Patients with Retrograde Ejaculation 157
Testicular Sperm 157
Procedure for Isolation of Testicular Sperm 158
Procedure for Preparation of Testicular Sperm 158

16. Molecular Genetics Techniques for Preimplantation Genetic Diagnosis 160
Francesco Fiorentino, Gayle M Jones
What do We Need to Test for? 161

17. Batch *In Vitro* Fertilization Program 181
Madhab C Das, K Jayaprakasan, Sameer Angras, Alex C Varghese
Selection and Preparation of Patients 181
Ultrasound Assessment of the Pelvis 182
Assessment of Ovarian Reserve 182
Clinical Management of Treatment Cycle 183
Advantages and Disadvantages 185
Characteristics of a Good Team 189

18. Laboratory Information and Document Management Systems 195
Lev Levkov, Candido Tomás
Organization of the Fertility Center and an IVF Laboratory 196
Computer Network System 197
Collection and Storage of Data of Patients and ART Treatments 200
Fertility Clinic Management Databases 202
Monitoring Systems in an IVF Laboratory 208
Document Management in Fertility Center and an IVF Laboratory 209

19. Future Developments 213
Giles Anthony Palmer
The Future Laboratory 213
Further Developments of *In Vitro* Culture 216
Automation of ICSI 218
Selecting for Success 218
Fertility Preservation 221

Index *231*
