The Complete First Year MBBS Practical Manual

Salient Features

- Aims at directing the first year MBBS students to overcome the mighty path of completing the first year
- Includes all the necessary topics which the MBBS student should know with its root basics
- Emphasises on all the practical aspects of anatomy, physiology and biochemistry in its unique way of presentation
- Describes text in simple language with explanatory diagrams
- Cites all the important questions and normal values
- Contains all practical aspects with explanation
- Incorporates chapterwise question bank and each chapter is filled with mnemonics
- Enriches with additional diagrams, charts and tables
- Presents the expected theory along with viva questions, standard exam-oriented questions and answers
- Gives histology illustrations in both microscopic and diagrammatic view
- Covers model question papers on anatomy, physiology and biochemistry.
