Contents

PART 1: BASIC PRINCIPLES OF REFRACTIVE SURGERY WITH PHAKIC IOLs

Section 1: Basic Principles of Refractive Surgery with Phakic IOLs

1. Phakic Intraocular Lenses and their Role in Modern Refractive Surgery *5*
- Angle-supported Anterior Chamber IOLs 5
- Iris-fixated Phakic IOLs 7
- Posterior Chamber Phakic IOLs 8
- Present and Future of Phakic IOLs 9

2. The Limits of LASIK: Comparative Analysis between Corneal and Phakic IOL Refractive Surgery *12*
- Corneal Surgery for Myopia and Hyperopia: An Overview 12
- The Limits of LASIK 14
- Complications of LASIK 17
- LASIK Versus Phakic IOLs 18

3. Refractive Surgery and Phakic IOLs *22*
- Surgical Correction of High Myopia and Hyperopia with Phakic IOLs 22
- Anatomical Location and Classification of Phakic IOLs 23

4. Proper Patient Assessment, Selection and Preparation *31*
- Assessment of Indications and Contraindications 31
- General Ophthalmic Examination 32
- Patient Education 47

PART 2: IMPLANTATION OF PHAKIC INTRAOCULAR LENSES

Section 2: Implantation of Phakic Intraocular Lenses for Myopia and Hyperopia Correction

5. Power Calculation for Phakic IOLs *57*
- Calculation of IOL Power 58
- Outcome of Studies 61
- Discussion 61

6. Iris-fixated Phakic IOLs *64*
- Background and Development 64
- Indications 64
- Artisan® 67

Artiflex® 70
Toric Artiflex® 73

7. The Kelman Duet Angle-supported Phakic IOL 77
Background and Development 78
Design Considerations 78
Insertion Technique 79
Last Personal Update Managing the Kelman Duet Phakic IOL 80
Statistical Analysis 81
Results 81
Complications 83
Morphological Study 83

8. The AcrySof® Cachet™ Angle-supported Phakic IOL 86
Background and Development 86
Insertion Technique 86
Clinical Results 92
Complications 93
Bioptics 94
Personal Perspective on Phakic IOLs 95

9. ICL Posterior Chamber Phakic IOL 96
Historical Background 96
The Visian ICL 99

10. PRL-Carl Zeiss Posterior Chamber Phakic Refractive Lens 123
Background and Development 123
Patient Selection 125
PRL Power Calculation 125
Surgical Technique 125
Clinical Results 129
Complications 131
Other Applications for the PRL 137

Section 3: Implantation of Phakic Intraocular Lenses for Astigmatism Correction

11. Phakic Intraocular Lenses for the Correction of Astigmatism 141

11A: Iris-fixated Phakic Intraocular Lenses for the Correction of Astigmatism 141
Use of Toric Phakic IOLs 141
Iris-fixated PIOLs 141
Patient Selection for Initial Cases 142
Pre-operative Considerations 143
Surgical Technique Pearls 143

11B: Toric Posterior Chamber Implantable Collamer Lens TICL® 146
Evolution 146
Current ICL Models and Powers 147

Indications of ICL and TICL 149
Selection Criteria and Pre-operative Assessment 151
ICL Sizing 152
ICL Power Calculation 154
Surgical Techniques 154
ICL Loading 155
ICL Implantation 155
Post-operative Care 156
Clinical Results 156
Stability of Toric ICL Alignment after Implantation 159
ICL in Stable Keratoconus 159
ICL after Corneal Ring Segments or Collagen Cross Linking in Progressive Keratoconus 159
Toric ICL after Corneal Grafts 160
Complications 160
Annexure 165

Section 4: Combined and Additive Procedures with Phakic IOLs

12. Bioptics and Adjustable Refractive Surgery for Extreme Ametropia: Current Concepts 171
Author's Experience 171
Surgical Technique 172

Section 5: New Trends in Refractive Surgery with Phakic IOLs

13. Future of Phakic IOLs 195

Appendix: Survey of Peer-reviewed Literature on Phakic Intraocular Lenses 199
