Contents

Section 1: Musculoskeletal System

1. Osteoporotic Bone Disease *3*
2. Soft Tissue Calcification (Plain X-ray Appearance) *13*
3. Inflammatory Arthropathy *34*
4. Spinal Trauma *45*
5. Connective Tissue Disorders Involving Joints *59*
6. Degenerative Disorders of Spine and Joints *65*
7. Osteolytic Bone Lesions *78*
8. Metabolic Bone Diseases *109*

Section 2: Central Nervous System

9. Craniospinal Tuberculosis *125*
10. Diseases of White Matter Brain Substances *134*

Section 3: Cardiovascular System

11. Diagnostic Approach to a Case of Congenital Cyanotic Heart Disease *151*
12. Valvular Heart Disease *171*

Section 4: Respiratory System

13. Pulmonary Infection *185*
14. Interstitial Lung Diseases *200*

Section 5: Gastrointestinal Tract, Pancreas and Hepatobiliary Tract

15. Imaging in Jaundice *221*
16. Portal Hypertension *237*
17. Hepatobiliary Intervention *251*
18. Abdominal Tuberculosis *265*
19. Intestinal Polyposis *277*

Section 6: Genitourinary System

20. Uremia and Imaging *289*
21. Role of Imaging in Gynecological Disorders *304*
22. Genitourinary Tuberculosis *318*

23. Medical Renal Diseases *331*
24. Planning of Radiology Department *350*
25. Common Radiopharmaceuticals Used in Various Systemic Disorders *374*
26. Radiation Hazard and Protection *397*
27. Ultrasonography of Systemic Antenatal Abnormalities *412*
28. Ultrasound and Color Doppler in Pelvic Masses *431*
29. Orbital Sonography *445*
30. Radiology of the Immunocompromised Patient *450*

Index *465*
