MCQs on Dental and Oral Anatomy, Physiology and Occlusion

1. Introduction 3
2. Dental Anthropology (Comparative Study of Dentition) 5
3. Development of Eruption of Teeth 6
4. Tooth and Surface Identification 16
5. Deciduous (Primary) Teeth 18
6. Physiology of Dentition 22
7. Physiologic Form of Teeth in Relation to Functions and Periodontium 25
8. Permanent Maxillary Incisors 33
9. Permanent Mandibular Incisors 35
10. Permanent Canines 37
11. Maxillary Premolars 40
12. Mandibular Premolars 43
13. Permanent Maxillary Molars 45
14. Pulp Cavities of the Teeth 48
15. Basic Concept of Occlusion and Malocclusion 50
16. Dento-osseous Structures 56
17. Temporomandibular Joints and their Functions 67
18. Miscellaneous 72

MCQs on Oral and Dental Histology and Embryology

19. Development and Growth of Face and Oral Cavity 77
20. Development of Teeth 83
21. Enamel 95

22. Dentin 110
23. Dental Pulp 125
24. Cementum 135
25. Periodontal Ligament 141
26. Oral Mucous Membrane 149
27. Alveolus 162
28. Salivary Glands 167
29. Eruption of Teeth and Physiologic Tooth Movements 173
30. Shedding of Deciduous Teeth 178
31. Temporomandibular Joint 181
32. Maxillary Sinus 182
33. Advanced Techniques in the Study of Oral Tissues 184
34. Miscellaneous 189
