Contents

1. Overview of ART 1
2. Infertility—Scope of Problem 5
3. Reproductive Anatomy and Physiology of a Couple 11
4. Natural Menstrual Cycle 27
5. Male Infertility—Causes and Investigations 33
6. Female Infertility—Causes and Investigations 49
7. The Infertility Clinic and IVF Lab Set Up 67
   - IVF-Lab Facility Set Up
   - Quality Control
   - Culture Media
   - Semen Evaluation and Preparation Facility
   - Embryology and Cellular Facility
8. Ovarian Stimulation 91
   - Basic Understanding
   - Conventional Protocol
   - Softer Protocol
   - Problem Cases
9. Transvaginal Sonography in Infertility 113
10. Ovulation Monitoring 159
11. Intrauterine Insemination 179

12. Procedures 185
- Ovum Pick Up
- Semen Preparation
- IVF/ICSI/TESA
- Insemination
- Fertilization
- Oocyte Preparation for ICSI
- Embryo Transfer

13. IVF—Protocol General 235
14. Gynecological Complications of ART 247
- OHSS
- Operative Complications
- Miscarriages
- Ectopic Pregnancy
- Psychological

15. Obstetric Complications 257
- High Order Multiple Pregnancy
- Aged Pregnancy
- Increased Anomaly Risk
- Low Birth Weight/Prematurity
- Altered Sex Ratio
- Operative Delivery

16. Cryobiology of ART 261
- Freezing of Gametes–Ova and Sperm
- Embryo
- Tissues—Ovaries and Testes
- Vitrification

17. Technological Advances—Future Frontiers 265

- **Oocyte Cryopreservation**
- **Ovarian Tissue Cryopreservation and Autografting**
- **IVM**
- **IMSI**
- **Spindle View**
- **Assisted Hatching**
- **PGD**

18. Ethics and Law 281
19. Counseling in Infertility 295
20. NARI (National ART Registry of India) 303
21. Regulation and Laws in ART 327
Appendix 337
- **Consent Forms**
- **Ideal Laboratory Plans**
