CONTENTS

SECTION ONE

1. Introduction to Clinical Biochemistry 1

Laboratory Safety Measures (2), Workplace Hazardous Materials Information System (3), First Aid Measures (4), Laboratory Waste Disposal (5), When We Enter a Laboratory(6), Sample Collection (7), Point of Care Testing–An Introduction (8).

SECTION TWO

2. Qualitative Estimation 11

Carbohydrates (11), Proteins (31), Lipids (56), Analysis of Normal Urine (63), Analysis of Pathological Urine (70), Milk (80).

3. Quantitative Estimation 87

Introduction (87), Principle of Colorimetry (87), Estimation of Blood Sugar (91), Estimation of Urea in Blood (97), Estimation of Creatinine in Serum (101), Estimation of Serum Cholesterol (103), Estimation of Serum Bilirubin (106), Estimation of Glucose in Urine (110), Estimation of Total Protein in Serum (113), Estimation of Creatinine in Urine (116), Estimation of Urea in Urine (119), Gastric Juice Analysis (122), Estimation of Amylase in Serum (125), Estimation of Alkaline Phosphatase in Serum (128), Serum Protein Electrophoresis (132), Chromatography for Sugars (135), Dry Reagent Chemistry Techniques (138), Analysis of Blood Electrolytes (142), Analysis of Blood Gases (146).

4. Data Interpretation 148

5. Spotters 158

Appendix 159

Reference Values (159), OSPE of Some Important Tests (163), Principles of Different Instruments (164).
