Contents

1. Statistics and Research **1**
- Meaning of statistics 1
- Meaning and characteristics of research 2
- Role of statistics in health science research 5

2. Types of Research **8**

3. Planning of Research Studies **13**

4. Collection of Data **20**
- Types of data 20
- Methods of data collection for field studies 21
- Tools preparation for data collection 28
- Collection of morbidity data 29

5. Tabulation of Data **30**
- Frequency distribution table 30
- Multiple classification 32
- Basic principles of tabulation of data 34
- Working method for tabulation of data 34
- Classification of diseases, injuries and causes of death, age and occupation 36

6. Graphical Presentation of Data **40**
- Basic concepts of graphical presentation 40
- Types of diagrams 41

7. Measures of Central Tendency **52**
- Need for measures of central tendency 52
- Definition and calculation of mean 53
- Calculation of mean for an ungrouped data 54
- Calculation of mean for grouped data 55
- Meaning and interpretation of median 62
- Calculation of the median 63
- Meaning and calculation of mode 66

8. Measures of Dispersion and Skewness **68**
- Need for measures of dispersion 68
- Range 69

- Mean deviation 69
- Standard deviation 71
- Calculation of standard deviation 71
- Measures of relative deviation 78
- Skewness 79

9. Probability and Standard Distributions 81
- Meaning of probability 81
- Standard distributions 83
- Normal distribution 84
- Standard normal variate 86
- Binomial distribution 88
- Poisson distribution 91

10. Sampling Techniques 94
- Necessity and meaning of sample 94
- Criteria for a good sample 95
- Some applications of sampling in community health 96
- Census enumeration versus sampling enumeration 98
- Method of selecting a random sample 98
- Sampling designs 100
- Size of the sample 103
- Calculation of sample size for field surveys 105
- Errors in sampling 107

11. Design of Clinical Trials 108
- Meaning of clinical trials 108
- Principles to be adopted in clinical trials 109
- Types of controls 109
- Formal designs for clinical trials 112
- Blinding during trials 116
- Sample size 117

12. Sampling Variation and Tests of Significance 119
- Sampling variation 119
- Some terms used in tests of significance 120
- General procedure for testing of a hypothesis 123

- Test for large samples 123
- Tests for comparing means of small samples 127
- χ^2 test for qualitative data 132
- Analysis of variance 138
- Analysis of co-variance 148
- Non parametric tests 148

13. Correlation and Regression 158

- Meaning and definition of correlation 158
- Scatter diagram 158
- Covariance 160
- Correlation coefficient 160
- Range and interpretation of correlation coefficient 161
- Calculation of correlation coefficient for ungrouped data 162
- Linear regression 163
- Linear regression equation 164
- Interpretation of linear regression 165
- Non-linear regression 166
- Multiple correlation and regression 167
- Partial correlation 168
- Spearman's rank correlation coefficient 170
- Logistic regression 172
- Estimation of the parameters 173
- Fitting of Model 173
- Goodness of fit of the Model 174
- Hypothesis Testing about Coefficients 174

14. Demography 176

- Definition and uses 176
- Stages of demographic evolution 177
- Sources of demographic data 178
- Census operations in India 178
- Definition of terms used in Indian census 180
- Population estimation methods 182

- Vital statistics registration 185
- Schemes for the improvement of vital statistics registration system 187

15. Health Indicators 190

- Importance of health indicators 190
- Concept of measures of health 190
- Types of health indicators 191
- Demographic indicators 191
- Morbidity indicators 194
- Mortality indicators 197
- Indicators of health services 203
- Hospital management indicators 203

16. Standardisation of Rates 205

- Meaning and need for standardisation 205
- Direct method of standardisation 206
- Indirect method of standardisation 207

17. The Life Table 212

- Concept of life table 212
- Description of the life table 213
- Construction of a life table 214

18. Survival Analysis 218

- Need for survival analysis in clinical studies 218
- Concepts in survival analysis 218
- Methods for estimation of survival rates 219
- Methods for estimation of net survival 228
- Methods for comparing the survival rates 230

Appendices:

1. Table of Normal Probability Integrals 233
2. Table of Random Numbers 235
3. Table of t-Distribution 237
4. Table of χ^2 Distribution 239
5. Table of Normal Distribution 241
6. Table of T-values for Wilcoxon's Signed Rank Test 242
7. Table of T-values at 5 Per cent Level for Mann-Whitney Test 243
