Contents

1. Basic Anatomy of the Human Eye and the Ametropias 1
Introduction 2
Cornea 3
Lens 8
Ametropia 11

2. Modern Cataract Surgery 17
Introduction 18
Causes 20
Epidemiology 20
Types of Cataracts 21
Demographics of Cataract 23
Treatment 27
Anesthetics for Cataract Surgery 28
Conventional Extracapsular Cataract Extraction 30
Phacoemulsification 33
Intraocular Lens Implantation 33
Immediate Postoperative Aftercare 34
Risks 36
Normal Results 36
Alternatives 37
Watchful Waiting 37
Surgical Alternatives 38
New Technology 38

3. Modern Refractive Surgery: How it is Done 43
Historical Background 44
Intrastromal Ring and Intrastromal Segment 46
Excimer Laser 50
Background 50
Current Applications (PRK, LARK, LASIK, LASEK, EpiLASIK) 51
Intraocular Implantation Lenses for Myopia and Hyperopia 54

4. Preoperative Selection for Cataract Surgery 59
Introduction 60
Current Treatment 60
Eye Examination 61
Pinhole Testing 62
Ocular Symmetry 62
Eyelid Symmetry 63
Sclera 63
Conjunctiva 64
Pupil and Iris 65
Testing Extraocular Movements 66
Visual Fields 67
Intraocular Pressure 69
Fundus Examination 69
Assessing the Pupil 70
Slit-lamp Biomicroscope 71
Closer Check of the Outer Structures of the Eye 72
Retina 74

5. Preoperative Selection for Patient Undergoing for Refractive Surgery 79
Patient Expectations 80
Choosing the Appropriate Clinic 81
Clinical Evaluation 83
Pachymetry 83
Keratometry and Videokeratography 83
Tear Function 84
Contraindications 84
Patient Education 86
Preoperative Considerations 86
Pupil Diameter 87
Topography 87
Manifest/Cycloplegic Refraction 87
Cover Test and Full Binocular Assessment 87
Tear Film Assessment 87

Slit-lamp Examination 88
Fundus Examination 88
Monitoring IOP 88

6. Postoperative Management: Aphakia, Pseudophakia and Phakic Intraocular Lenses 91
Postoperative Refraction 92
Aphakia 92
Pseudophakia and Phakic Intra-ocular Lenses 94
Contrast Sensitivity 102
Tear Film/Pain Management 106
Tear Stability 108
Tear Volume 112
Tear Lipid Volume 116
Quality of the Ocular Surface and Anterior Segment 117

7. Postoperative Management: Refractive Surgery 125
Refraction 126
Accommodation and Near Refraction 131
Corneal Topography 135
Pachymetry 140
Pupil 143
Aberrometry 144
Corneal Sensitivity 146
Tear Film/Pain Management 148
Corneal Rigidity 151
Cost 152
