Contents

1. Epidemiology of HIV/AIDs 1

Worldwide Affection of HIV and AIDS 1

2. Human Immunodeficiency Virus 5

Structure 5
Life Cycle and Pathogenesis 6

3. Mucocutaneous Infections in HIV/AIDs 9

Viral Infections 9
Bacterial Infections 14
Mycobacterial Infections 20
Fungal Infections 20
Parasitic Infestations 24

4. Sexually Transmitted Infections in HIV/AIDS 26

Increased Infectiousness 26
Increased Susceptibility 26
Viral STIs 26
Herpes Genitalis 27
Human Papilloma Virus Infection Anogenital Warts; Condyloma Acuminata 28
Molluscum Contagiosum 30
Other Viral STIs 31
Bacterial STIs 31
Lymphogranuloma Venerum 33
Donovanosis 34
Syphilis 35
Other STIs 38

5. Non-infectious Dermatosis in HIV/AIDs 40

Common Non-Infectious Dermatoses in HIV 40
Uncommon Dermatoses 40
Seborrheic Dermatitis 41
Eosinophilic Folliculitis 42
Pruritic Papular Eruptions 42
Psoriasis 42
Reiter's Disease 45
Photosensitivity 45
Other Rare Associations with HIV 45
Behçet's Syndrome 49
Neoplasms 49

6. Oral Cavity **55**

Infectious Diseases 55
Noninfectious 59
Drug Induced 61
Malignancy 61

7. Dermatology in Cross-linked Hyaluronic Acid **62**

Clinical Spectrum of Dermatological Manifestations 62

8. Immune Reconstitution Inflammatory Syndrome **74**

Definition 74
Pathogenesis of IRIS 74
Degree of Immune Restoration following HAART 74
Risk Factors for Development of IRIS 75
Types of IRIS 75

9. Drug Reactions **79**

Classification of ADR 79
Challenges to Antibacterial and Antiretroviral Therapy in HIV 79
