Contents

SECTION I: PRACTICAL ASPECTS OF OBSTETRICS AND GYNECOLOGY

1. How to Communicate Effectively with Patients 3
Why Good Patient Communication is Important? 5
Practical Strategies for Today's Clinical Environment 7
Get the Patient Encounter off to a Good Start ..8
Non-verbal Communication 10
Words 14
Partner with Your Patient 20
Making Necessary Adjustments 25
Going the Extra Mile 28

2. History Taking 34

3. Obstetrical Examination 46
Historical Perspectives 46
Obstetric History Taking 46
Antenatal Investigations 47
Components of an Obstetric examination 47
General Examination 48
Systemic Examination 48

Obstetric Examination 49
Inspection 49
Palpation 50
Auscultation 55
Inspection of External Genitalia 56
Speculum Examination in an Obstetric Patient 56
Pelvic Examination in an Obstetric Patient 57
Cervix 57
Bishop's Score 58
Membranes and Liquor 58
Presenting Part and Station 58
Pelvic Assessment 60

4. Gynecological Examination 63

Introduction 63
Indications for Pelvic Examination 63
Frequency of a Pelvic Examination 64
Competence 64
Consent 64
Confidentiality 65
Chaperones 65
Considerations Prior to Examination 65
The Examination Environment 66
The Examination Procedure 67
Bimanual Pelvic Examination 75
Post Examination Procedure 77
Rectal Examination 77
Breast Examination in Gynecology 78
Specific Considerations 78
Specific procedures and Investigations in Gynecology 80

5. Instruments 83
How to Describe an Instrument? 83
Speculum 84
Sims' Anterior Vaginal Wall Retractor 91
IUCD Removing Hook 94
Sponge Holding Forceps 95
Green Armytage Forceps 98
Vulsellum (Teale's) 99
Tenaculum 101
Cervical Dilators 102
Curettes 106
Babcock's Forceps 109
Pedicle Clamps 110
Ovum Forceps 112
Pinard's Stethoscope 113
Catheter 114
Urine Drainage Collection Bag 123
Uterine Packing Forceps 123
Uterus Holding Forceps (Shirodkar's) 124
Umbilical Cord Clamp 126
Umbilical Scissors 127
Laminaria Tent 128
Uterine Manipulator 130
Myomectomy Instruments 131
Hysterosalpingography Cannula 135
Doyen's Cross Action Towel Clip 137
Dissecting Forceps 138
Allis Forceps 139
Artery Forceps (Spenser Well's) 140
Suction Cannula 141
Karman's Syringe 143

Needle Holder 144
Retractors 145

6. Imaging Modalities in Obstetrics and Gynecology 151
Facts 152
Guidelines for Diagnostic Imaging During Pregnancy 153
How to Describe X-ray in Obstetrics 159
X-rays in Obstetric Examination 160
Use of X-ray in Gynecology 166
Hysterosalpingography (HSG) 167
Role of MRI in Obstetrics 191

7. Ultrasound in Gynecology and Obstetrics 194
Technology 194
Guidelines for Performing Gynecological Ultrasound 195
Ultrasound in Obstetrics 212
Pregnancy Diagnosis 213
Complications of First Trimester Pregnancy ... 229
Use of Fetal Doppler 243
3 D and 4 D Ultrasonography 245

8. Wound Healing, Sutures and Surgical Knots 251
The Wound and Wound Healing 251
Patient Factors that Affect Wound Healing 253
Surgical Principles 255
Classification of Wounds 259
Types of Wound Healing 261
Sutures 268
Classification of Suture Materials 273

Principles of Suture Selection 285
Wound Closure Technique 288
Knots 292
9. Health Programs 306
Reproductive and Child Health Program-II (2004-2009) 306
National Rural Health Mission (2005-12) 311
Janani Suraksha Yojana (JSY) 316
The Medical Termination of Pregnancy Act, 1971 and the MTP Rules and Regulations 2003 320
National Nutritional Anemia Prophylaxis Programme (NNAPP) 324
The Registration of Births and Deaths Act, 1969 325
The Pre-natal Diagnostic Techniques (Regulation and Prevention of Misuse) Act, 1994 (Pndt Act) 326
The Prenatal Diagnostic Techniques (Regulation and Prevention of Misuse) Amendment Act, 2002 (Amended Up to February 2003) 326

SECTION II: OBSTETRICS

10. Obstetrical Cases 331
Diabetes in Pregnancy 331
Twin Pregnancy 345
Malpresentation 358
Breech 358
Transverse Lie 371
Intrauterine Growth Restriction 376

Intrauterine Fetal Death 386
Post-Term Pregnancy 394
Post-Cesarean Pregnancy 404
Hypertensive Disorders of Pregnancy 418
Antepartum Hemorrhage 434
Puerperium 446

11. Instrumental Vaginal Delivery 461
Obstetric Forceps 461
Rotational Forceps 476
Vacuum Extraction 481

12. The Partogram 496
What is a Partogram? 496
History 497
Why do a Partogram? 498
The Partogram 499
Cervical Dilatation 503
Descent of Fetal Head 505
Uterine Contractions 506
Fetal Heart Rate 507
Membranes and Liquor 508
Maternal Condition 508
Advantages of Partogram 509
Simplified Partograph 511
Paper-less Partogram 512

13. Electronic Fetal Monitoring 514
Interpretation of the CTG 517
Periodic Changes 527
Appropriate Monitoring in an Uncomplicated Pregnancy 536
Algorithm for Pathological CTG 541
Case Scenario-1 546

14. Postpartum Hemorrhage 549
Definition 549
Types 550
Etiology 550
Management 551
Treatment 555
Management of Secondary PPH 566

SECTION III: GYNECOLOGY

15. Gynecological Cases 569
Pelvic Organ Prolapse 569
Urinary Incontinence 584
Complete Perineal Tear 604
Vesicovaginal Fistula 610
Abdominal Lump 619
Ovarian Tumor 629
Ovarian Malignancy 636
Amenorrhea 645
Classification 645
Primary Amenorrhea 646
Secondary Amenorrhea 665
Postmenopausal Bleeding 675
Recurrent Postmenopausal Bleeding 681
16. Cervical Screening 682
Cytology Screening 682
Guidelines for Cervical Cancer Screening 691
Colposcopy 697
Cryotherapy 717

Appendix 1: Scoring, Evidence-based Medicine and Staging 727

Appendix 2: Normal Values 741

Index 749
