Contents

1. Applied Physiology 1
Physiological Principles 1
Alveoli is Atelectatic 5
Alveolar Overdistention 6
Conceptual Models of Applied Physiology 7
Anatomical Considerations 9
Physiological Considerations 10

2. Effects of CPAP 16
Long-Term Implication 18
Physiological Significance of CPAP Levels 18

3. Clinical Assessment of Respiratory Distress 22
Clinical Assessment for Respiratory Distress Syndrome (RDS) 22

4. Indications and Contraindications of CPAP 25
Specific Indications for CPAP 25
Physical Criteria to Apply CPAP 26

5. CPAP Protocol 29
Guidelines for CPAP 29
Aims of CPAP 29
Guidelines in Atelectatic Disorders 30
Early Predictors of CPAP Failure in VLBW Babies 31

6. Optimum CPAP 32
Optimum CPAP 32
Road to Optimum CPAP 32

7. Failure of CPAP 35
Causes 35

8. Weaning from CPAP 37
Respiratory Distress Syndrome (RDS) 37
Pre-extubation Protocol 37
CPAP Management According to Birth Weight 38

9. Complications of CPAP 41
Pulmonary Complications 41
Pneumothorax 41
Hazards and Complications Associated with Equipment 42

10. CPAP and X-rays 44
Disease Profiles 49
Clinical Clues on CO_2 55

11. Blood Gas Analysis 56
Acid-Base Status 56
Basic Questions in Analysis of Arterial Blood Gas (ABG) 58
pH 59

12. Strategies in Specific Disorders 60
Respiratory Distress Syndrome (RDS) 60
Apnea of Prematurity 63
Approach to Meconium Aspiration (MAS) 63
Postextubation Management 65

13. Case Scenarios 68
Case 1 68
Case 2 70
Case 3 71

14. CPAP Devices 75
Conceptual Models of Operation 75
Ventilator CPAP 75
Methods of Generating CPAP 77
CPAP Pressure Stability 84
Methods of Delivering CPAP 89
Insure (Intubation Surfactant Extubation) 94

15. Setting-up CPAP 100
Basic Principles 100
Bubble CPAP System 102

16. Troubleshooting 104
Baby Interphase 104
Nasal Prong Interface 104
Nasal Prongs 106

17. CPAP in Developing Countries 110
Indigenous CPAP Machines 110
Implications in Developing Countries 111
Recommendations from the 3 months Structured Training Program in Ventilation 112
Implications for Practice in Developing Countries 112

18. Certain Dictums in CPAP Management 118
The Impact of CPAP in Neonatal Respiratory Care 119
Amrita Institute of Medical Sciences (AIMS) Study 119

19. Product Information 121
Argyle Prongs for CPAP 121
Hudson's Prongs for CPAP 122
Nasal Prong Comparison 122
Product Information of CPAP 123
Indigenous CPAP System 127

20. Columbia Protocols 129
