Contents

1. Introduction 1

2. Types of Wastes 4
Waste 4
General Waste 4
Biomedical Waste 4

3. Major and Minor Sources of Biomedical Waste 15
Waste Generation 16

4. Categories and Classification of Biomedical Wastes 18
Objectives of Biomedical Waste Management 18
Categories of Biomedical Waste (As given in BMW Rules, 1998) 19
Classification of Biomedical Waste 21

5. Hazards of Biomedical Waste 23
Hazards of Biomedical/Healthcare Waste 23

6. Need for Disposal of Biomedical Waste 32
Health Reasons 32
Ethical Aspects 33
Environmental Reasons 34

7. Waste Minimization 37
Need for Waste Minimization 37
Advantages of Waste Minimization 38
A Few Examples of Waste Minimization Procedures 39

8. Waste Segregation and Labeling 42
Waste Segregation 42
Requirements for Waste Segregation 45
Significance 46
Persons Responsible for Segregation 46
Procedure for Segregation 46
Rules for Segregation 47
Advantages of Segregation 48
Containers for Waste Collection 49
Labeling 53

9. Waste Handling, Collection, Storage and Transportation 56
Waste Handling 56
Collection 58
Storage 60
Transportation of Biomedical Waste 62

10. Treatment and Disposal 69
Waste Treatment 69
Category-wise Management of Biomedical Waste 73
Methods for Treatment of Biomedical Waste 91
Landfill 121

11. Dental Office Wastes 123
Types of Hazardous Dental Wastes 123
Mercury Containing Wastes 123
Silver Containing Wastes 133
Lead Containing Wastes 138
Biomedical Wastes 140
Chemicals, Disinfectants and Sterilizing Agents 142
Pollution Prevention for Dentists 146

12. Training of Healthcare Workers 151
AIMS of Training 151
Who Needs Training? 152
Recommendations for Training of Healthcare Personnel 154
Recommendations for Training of Waste Handlers 154
Training for Waste Transportation Staff 155
Training of Operators of Treatment Plants 156
Training of Landfill Operators 156
Public Awareness on Hazards of Healthcare Waste 157

13. Immunization of Healthcare Workers 158
Management of Occupational Blood Exposures 158
Hepatitis A Vaccination 161
Hepatitis B Vaccine Dose and Administration 164
Management of Occupational Exposures to HIV and Recommendations for Postexposure Prophylaxis 168
Recommended HIV Postexposure Prophylaxis (PEP) for Percutaneous Injuries 169
HIV PEP 170
Occupational Transmission of HCV 172
Rabies 173
H1N1 Flu (Swine Flu) 174

14. Infection Control Practices in Waste Management 182
Infection Control 182
Standard Precautions 183
Additional (Transmission-Based) Precautions 191
