Contents

1. History of Human Assisted Reproductive Technology **1**
Parikshit Tank, Narendra Malhotra, Neharika Malhotra

Major Milestones of the Process 3

The History of *In Vitro* Fertilization (IVF)—The Milestones 3

2. Infertility in the Developing World **21**
Rajat Gyaneshwar

3. Need for Assisted Reproductive Technology in Low-resource Setting **24**
Rohana Haththotuwa, Upul Senarath

Prevalence of Infertility in Low-resource Settings 24

Fertility Preference and Factors Influencing Preferences 25

– Consequences of Childlessness 25

Need for ART in Low-resource Settings 27

Barriers for ART Programs 28

– Low Priority 28

– Overpopulation 28

– High Cost 28

Suggested Procedures to Improve the Management of Infertility in Low-resource Settings 29

– Infertility Treatment should be a Part of an Integrated Reproductive Care Program 29

– Investments for Prevention of Infertility 29

– Public Education 29

– Empowering Women 29

– Simplifying Diagnostic Procedures 30

– Simplified Treatment and Non-IVF Assisted Reproduction 30

– Simplified Assisted Reproduction 30

Research on ART 30

– Monitoring ART Services 30

– Economic Prosperity, Bridging the Economic Disparities 30

Funding for ART in Developing Countries 31

4. Meeting the Challenges in Low-resource Setting **33**
Bhola Rijal, Rajesh Chaudhary, Sabina Pradhan

Burden 34

Context of infertility in Nepal 34

The Challenges in Providing Affordable ART: The Present Scenario in Low-resource Countries 35

Towards Solution: A Plea for Affordable ART for All 37

– Simplifying Technology 37

– Education and Training 39

– Surveillance and Reporting for Affordable ART of Quality 40

Affordable IVF through Private Public Partnership 40

Role of Government 40

5. Establishing an ART Unit in a Low-resource Settings **44**
Haroon Latif Khan

Etiology 45

Investigations 46

– Preliminary Workup 46

Hysterosalpingography 46
– Sonohysterography 46
– Laparoscopy 48
– Treatment 48
– Controlled Ovarian Stimulation 49
How to Reduce the Cost of ART? 51
– Facility 51
– Personnel 51
– Laboratory Equipment 51
– Follicular Tracking 51
– Training 52
– Cost of Disposables/Culture Medium 53
– Treatment in Batches 53
– Satellite Clinics 53
– Intravaginal Culture (INVOCEL) 53
In vitro Maturation of Oocytes 53
– Ovarian Hyperstimulation Syndrome (OHSS) 54
– Single Embryo Transfer 54

6. The Laboratory Minimum Acceptable Standards 57
Manish Banker, Bharat Joshi
Minimal Personnel 57
Requirements of an ART Clinic 57
– Laboratory Staff Requirement 57
Minimal Physical 58
Requirements of an ART Clinic 58
– Laboratory Design 59
– Laboratory Equipment 60
Minimal Quality Control Parameters 62
– Hydrogen Ion Concentration (pH) 63
– Osmolality 63
– Temperature 63
– Light 63
Miscellaneous 63
– Identification 63
– Record Keeping 63
– Data Analysis 64

7. Counseling of the Infertile Couples 65
Kamini A Rao
Fundamental Issues in Counseling 65
– Implications Counseling 66
– Support Counseling 66
– Therapeutic Counseling 66
The Counselor 67
The Beneficiaries 67
Special Issue 67

8. Transvaginal Sonography in Infertility 68
Narendra Malhotra, Jaideep Malhotra, Neharika Malhotra, JP Rao, Sakshi Tomar
Cervix 69
Uterus 69
– Endometrium 69
– Uterine Biophysical Profile 71
– Uterine Cavity Evaluation 72
Tubes 72
Ovary 72
Follicular Monitoring 74
– Oocyte Retrieval 74
Role of Color Doppler in Infertility 74
Study of Menstrual Cycle by Color Doppler 75
– Changes in the Ovary 75
– Uterine Perfusion 75
– Changes in the Endometrium 76
Ultrasound Technique for Uterine Biophysical Profile 76
– Uterine Biophysical Profile 77

Role of Three-dimensional Ultrasonography 78
Role of TVS in Interventional Procedures 81

9. Fertility Enhancing Surgeries 82
Shyam V Desai

Uterine Septum Incision 82
– Procedure 82
Intrauterine Adhesions 83
– Classification 83
– Procedure 83
Endometrial Polyps 84
– Procedure 84
Submucous Myomas 84
– Procedure 84
Removal of Foreign Bodies 85
Hysteroscopic Tubal Cannulation 85
Donnez and Casanas-Roux Classification of Cornual Blocks 85
– Procedure 86
Laparoscopic Procedures for Fertility Enhancement 86
Tubal Surgeries 86
– Salpingo-ovariolysis 88
– Salpingostomy 88
– Fimbrioplasty 88
Surgery for Endometriosis 89
– Superficial Endometriosis 89
– Endometriosis in the Pouch of Douglas 89
– Endometrioma 90
Laparoscopic Myomectomy 90
– Procedure 91
PCOD Cauterization 92
– Procedure 92
Laparoscopic Correction of Uterine Anomalies 93

10. Endometriosis and Infertility 95
Ian S Fraser, Sonal Karia

Definition 95
Pathophysiology of Endometriosis 96
Mechanism of Endometriosis Associated Infertility 96
Diagnosis 97
– Clinical 97
– Role of Imaging 98
– Serum Markers in Endometriosis 98
– Endometrial Nerve Fibers 99
– Laparoscopy 99
Management 99
– Expectant Management 99
– Medical Management 100
– Surgical Management 100
– Outcomes of Surgical Treatment 100
– Surgery for Endometriomas 101
– Assisted Reproduction for Treatment of Endometriosis Related Infertility 101
– *In vitro* Fertilization 102
– Effect of Pre-IVF Treatment on IVF Outcome 102
– Challenges Related to the Management of Endometriosis in Low-resource Settings 102

11. Polycystic Ovary Syndrome and Infertility 105
Hang Wun Raymond Li, Ernest Hung Yu Ng, PC Ho

Initial Assessment and Investigations 105
– History 105
– Physical Examination 106
– Investigations 106
Treatment of Anovulatory Subfertility in PCOS 106
– Weight Reduction 106

– Clomiphene Citrate 107
– Metformin 107
– Laparoscopic Ovarian Drilling 108
– Gonadotropin 108
– *In Vitro* Fertilization 109
Summary 110
Other Health Problems in PCOS 110

12. Fibroids and Infertility 112
Jaideep Malhotra, Lakhwinder Singh Narendra Malhotra
Myomas and Obstetrical Outcomes 113
– Laparoscopic versus Abdominal Myomectomy 114
Adhesions 114
– Laparoscopic versus Abdominal Myomectomy 114
Pregnancy after Laparoscopic Myomectomy 115
– Uterine Rupture after Laparoscopic Myomectomy 117
Entry into the Cavity 117
Hysteroscopic Removal 117
– Management of Fibroids in Infertility 117

13. Managing Male Infertility Clinically in Low-resource Setting 121
Vijay Kulkarni
Transrectal ultrasound (TRUS) to Confirm CABVD 122
– Vasography 122
Cryopreservation of Sperms in Situational Anejaculation 122
Dedicated Vibration Device vs Locally Available Vibrators 122
Electroejaculation for Diagnosis and Cryopreservation 123
– Color Duplex Doppler (CDD) for Varicocele against Simple Doppler Probe 123
– Prolonged Medical Trials 123

14. Milder Stimulation Only Justified
Shee-Uan Chen, Yu-Shih Yang
Physiological Recruitment, Selection and Dominance of Ovarian Follicles 124
Principle of Standard Maximal Stimulation and Milder Stimulation 124
– Factors are Helpful to Determine the Regime of Ovarian Stimulation for Individuals 125
Clomiphene Citrate 126
Aromatase Inhibitor 126
– Gonadotropin in the Alternative Days or Clomiphene Plus Gonadotropin 127
Clomiphene Plus Gonadotropin and Antagonist Protocol 127
Delayed Low-dose Gonadotropin plus GnRH Antagonist Protocol 127
hCG Administration in the Late Follicular Phase 128
Natural Cycle IVF 128
Oral Contraceptive Pretreatment for Synchronization 128
– Milder Stimulation Benefits for Endometrial Receptivity 128
– Milder Stimulation may Benefit for Oocyte Quality 129
– Milder Stimulation Benefits for Luteal Function 129
– Milder Stimulation Reduces Cost, Complexity, Discomfort and Drop-out Rates 129
– Milder Stimulation Reduces OHSS and Improves Safety 130
– Milder Stimulation Achieves Reasonable Pregnancy Potential 130
– Milder Stimulation with Single Embryo Transfer (SET) Prevents

Complication from Multiple Pregnancy 130
– Embryo Cryopreservation using Vitrification is Helpful for the Milder Stimulation Strategy 131
– Milder Stimulation can be used for High Responder, Normal Responder and Poor Ovarian Reserve 131

15. The Role of Intrauterine Insemination in Low-resource Setups 136
Sheila Loh, Yin Yin Yong

Indications of IUI 137
Factors Affecting IUI Success Rates 137
– Patient Characteristics and Pregnancy Rate with IUI 137
– Ovarian Stimulation 138
– Follicle Monitoring Techniques and Timing of IUI 138
– Type of IUI Catheter 138
– Number of Inseminations 139
– Number of IUI Cycles 139
– Laboratory Factors 139
– Luteal Phase Support 139
– Adjunctive Therapy with GnRH Agonists and Antagonists 140
IUI versus ART: Cost-effectivness 140

16. *In Vitro* Maturation 143
Seung-Yup Ku, Shin Yong Moon

Why IVM? 143
Oocytes from Antral Follicles 143
How to do IVM? 144
Cytoplasmic Maturity in Oocytes 145
Insemination after IVM 146
Oocyte Aging 146
Embryonic Development 147
IVM Media 147
IVM for Fertility Preservation 148
Perspectives 148

17. Advances in Assisted Reproductive Technologies in Low-resource Settings 151
Hrishikesh Pai, Rishma Pai
Nandita Palshetkar, Nandan Roongta
Rutvij Dalal

Pretreatment 151
– Uterine Myomas 152
– Endometriosis 152
– Hydrosalpinges 152
PCOD 152
Ovulation Induction 152
IVF Laboratory 154
– Laboratory Setup 154
– Intracytoplasmic Sperm Injection and Intracytoplasmic Morphologically Selected Sperm Injection 154
PICSI 154
– *In Vitro* Maturation 155
– Laser Hatching 155
– Blastocyst Culture 155
INVO Vaginal Culture 155
– Embryo Cryopreservation 155
– Semen and Oocyte Banking 156
– Human Embryo Selection—based on Morphology/Metabolism/Genetics 156
– Luteal Phase Support 156

18. The Art and Science of Embryo Transfer 158
Derek F Lok, Priya Sivadas

Factors affecting the ET Success 158
– Timing or Stage of Embryo Transfer 158
– Introduction of Foreign Body (transfer catheter) into Endometrial Cavity 159

– Endometrial Trauma from Embryo Transfer Catheters 160
– Embryo Misplacement, Displacement and Uterine Contractions 160
– Ultrasound Guidance and Depositing Embryo 161
Embryo Transfer 161
Difficult Transfers 162

19. Third Party Reproduction: Techniques, Ethics and Economics 166
Nandita Palshetkar, Hrishikesh Pai Shivanand Sakhare, Nandan Roongta
Oocyte Donation 166
– Selection and Screening of Oocyte Donor 166
– Donor Stimulation 167
Recipient Preparation 167
– Intrafamilial Donation: Ethical Issues 167
– Shared Oocyte Donation: Economical in a Low-resource Setting 168
– Oocyte Donation in Postmenopausal Women: Ethical Issues 168
– Oocyte Donation: Emotional Aspects 169
Embryo Donation 169
Gestational Surrogacy 169
– Selection and Screening of Surrogate 170
– Gestational Surrogacy: ICMR Code of Practice, Ethical Considerations 170
– Unanswered Ethical Issues 171
– Intrafamilial Surrogacy: Economical Option 171

20. *In Vitro* Fertilization on the Move 173
Jaideep Malhotra, Ragweshwar Jyoti

21. Minimizing Risks and Complication of ART in Restricted Resource Setup 180
Jaideep Malhotra, Jaydeep D Tank, Bhavna Sharma
Ovarian Hyperstimulation Syndrome (OHSS) 180
– Classification 180
– Prevention 181
– Treatment 183
Multiple Pregnancies 184
Complications of Oocyte Pick-up 185

22. Cryopreservation: A Frozen Life 187
Ivan Rizal Sini
Slow Freezing vs Vitrification 187
Vitrification of Oocytes 189
Assisted Hatching in Cryopreservation 190
Endometrium Preparation 191
Future 191

23. The Law and Assisted Reproductive Technology 194
Sanjay Gupte
What is Assisted Reproductive Technology? 194
The Law and ART 194
Laws and Guidelines Regarding Assisted Reproduction 195
Australia 195
Belgium 196
Canada 196
France 197
Germany 197
Italy 198
India 198

– ICMR Guidelines for Setting up ART Clinics 199
– Surrogacy in India 200
Japan 202
Singapore 202
United Kingdom 202
United States of America 203

24. Role of Alternative Therapies 204
Tomoko Inoue, Yoshiharu Morimoto

What are Alternative Therapies? 204
Herbal Medicines 205
– Improvement of Reproductive Function 206
– Herbal Medicine for Polycystic Ovary Syndrome 206
– Hachimijiogan for Hyperprolactinemia and Male Infertility 206
– Wen-Jing-Tang for Inducing Ovulation 207
– Other Herbal Medicines for Various Symptoms of Female Patients 207
Acupuncture 207
Autogenic Training 208
Supplements 209
– Antioxidant Supplements for Male Infertility 209
– Anti-aging Supplements for Female Infertility 209
– Melatonin 209
Lifestyle 210
– Cessation of Smoking 210
– Avoidance of Alcoholic Beverages and Recreational Drugs 210

25. Managing Failures—Troubleshooting and Patient Counseling 212
RJ Norman

Approaches to Lack of Success in Infertility Treatment 212
– Adequate Diagnosis 213
– Counseling 213
Assisted Reproductive Technology 214
– *In Vitro* Fertilization 215

26. When to Call it a Day 216
Asma Munir

Biological Factors Inhibiting Pregnancy and their Progression 216
Economic and Financial Implications 218
Alternatives to ART in Obtaining A Family, The Religious and Ethical Limitations 219
Implications of the Extended Family in Indo-Pakistan 219

Index 221
