CONTENTS

SECTION I: EMBRYOLOGY

1. General Embryology 3
2. Pharyngeal System and Development of the Head and Neck 5

SECTION II: OROFACIAL AND DENTAL ANATOMY

3. Orofacial Anatomy 19
4. General Dental Anatomy 21
5. Permanent Incisors 23
6. Permanent Canines 25
7. Premolars 27
8. Permanent Molars 30
9. Comparison between Primary and Permanent Dentitions 33
10. Deciduous Dentition 35
11. Development of Occlusion and Occlusion 38
12. Clinical Considerations of Teeth 41

SECTION III: ORAL HISTOLOGY

13. Development of Tooth and Supporting Structures 65
14. Enamel 69
15. Dentin 74
16. Pulp 77
17. Cementum 79
18. Periodontal Ligament 82
19. Bone 85
20. Oral Mucosa and Taste 87
21. Eruption and Shedding 90
22. Salivary Glands and Saliva 93

SECTION IV: ORAL PATHOLOGY

23. Developmental Disturbances Affecting Dental Hard Tissues 131
24. Developmental Disturbances Affecting Oral and Maxillofacial Regions 134
25. Dental Caries 138
26. Pulp and Periapical Pathology 141
27. Periodontal Diseases 144
28. Epithelial Pathology 146
29. Reactive Lesions and Connective Tissue Tumors 151
30. Odontogenic Tumors 156
31. Cysts of the Jaws 160
32. Bone Pathology 164
33. Salivary Gland Disorders 169

34. Dermatologic Diseases 176
35. Allergic and Immunologic Disorders 179
36. Oral Manifestations of Systemic Diseases 181
37. Hematologic Disorders 184
38. Lymphoproliferative Disorders 189
39. Spread of Oral Infections 193
40. Facial Pain, Neuromuscular Disorders and Temporomandibular Disorders 194
41. Forensic Odontology 197

SECTION V: ORAL MICROBIOLOGY

42. General Microbiology and Normal Oral Microflora 259
43. Microbial Infections 261
