Contents

1. Introduction 1

History of Pharmaceutical Practice through Ages 1; Indian Systems of Medicines 2; Pharmacy in Relation to Allied Health Profession 4; Pharmacy as a Career 7; Pharmacy Education and Regulatory Bodies in India 12; Dosage Forms 13; Pharmacopoeia 17; Some Important Compendial Terms 25; General Guidelines for Manufacturing 29

2. Solid Dosage Forms 32

Tablets 32; Formulation Considerations 36; Processes for Tablet Manufacture 38; Problems in Tablet Compression and Some Solutions 43; Manufacture of Tablets 45; Process Control Tests for Tablets 48; Formulations 55; Coating of Tablets 62; Dental Cones 69; Troches and Lozenges 69; Compressed Lozenges 70; Capsules 72; General Standards 79; Evaluation of Fomulations 87; Powders and Granules 88; General Standards 90; Evaluation of Oral Powders 95; Dusting Powders 95; Douche Powders 98; Triturations 98; Insufflations 99; Cachets 100; Standards 101; Pessaries 102; Suppositories 105

3. Liquid Dosage Forms 114

Oral Liquids 114; Types of Oral Liquids and Definitions 114; Formulation Considerations 116; General Standards 122; Solutions 123; Evaluation of Solution Formulations 123; Syrups 124; Formulations 126; Elixirs 132; Linctuses 141; Extracts 145; Processes of Extraction 147; Tinctures 158; Aromatic Waters 162; Infusions 167; Suspensions 169; Evaluation of Suspensions 174; Mixtures 181; Emulsions 188; Emulsifying Agents 190; Microemulsions 196; Multiple Emulsion 197; Gel Emulsions 197; Solution Used in Body Cavity 198; Gargles 198; Mouthwashes 200; Enemas 203; Spirits 205; Liquid Preparations for External Use 210; Collodions 215; Liniments 217; Lotion 220; Magmas 225; Milk of Magnesia 226; Glycerites 227; Paints 228

4. Semisolid Dosage Forms 233

Ointments 233; Formulation Considerations 235; Formulations 236; Creams 240; Pastes 249; Gels 254; Jellies 261; Evaluation of a Semisolid Preparation 263; General Standards 263

5. Sterile Preparations 266

Parenteral Preparations (Injectables) 266; General Standards 267; Intravenous Infusions 268; Implants 269; Formulation Considerations 269; General Methods 272; Adjustment of Isotonic ity/iso-osmocity of Sterile Preparations 282; Process Control Tests for Injectables 283; Formulations 293; Ophthalmics 298; Eyedrops 298; Eye Lotions 306; Evaluation of Eyedrop, Eye Lotion 308; Eye Ointments 309; Evaluation of Eye Ointment 314

6. Gaseous Dosage Forms 317

Inhalations 317; Formulations 317; Inhalants 319; Aerosol 320; Formulation Considerations 321; General Standards 324

7. Systems of Weights and Measures 327

8. Pharmaceutical Calculations 331

Weights 331; Volume 331; Figures 332; Exponent, Power and Root 332; Addition, Subtraction, Multiplication and Division 333; Reducing and Enlarging of Formulas 334; Percentage and Ratio Strength 336; Dilution 338; Parts Per Million 339; Mixture of Different Concentrations (Arithmatic method) 339; Mixture of Different Concentrations (Alligation method) 340; Proof Spirit 341; Equivalent Weight and Milliequivalent Weights 343; Osmolarity and Osmolality 350; Dose Calculation 358
