Contents

1. What is Alignment and Malalignment? 1
Dror Paley

- Mechanical and Anatomic Axes 2
- Mechanical Axis Deviation 5
- Rationale for the Joint Orientation Angles 9
- Malalignment 10
- Malorientation of the Ankle and Hip Joints 11
- Ground Reaction Force Vector 15

2. Alignment? How Do We Measure It? 19
Andrea Baldini, Francesco Traverso

- Knee Coronal (or Frontal) Plane Assessment 22
- Knee Sagittal (or Lateral) Plane Assessment 26
- Knee Axial Plane Assessment 33

3. Frontal and Sagittal Alignment in Knee Arthroplasty 43
Hofmann Siegfried, Djahani Oliver, Pietsch M

- Conventional Navigation 45
- Results 49

4. Rotational Alignment in Knee Arthroplasty 53
Nicolas Dorval, Sébastien Paratte, Jean-Noël Argenson

- Femoral Component Rotation 54
- Tibial Component Rotation 60

5. Finding Anatomical Landmarks in the Normal and Arthritic Knee 67
Andrew A Amis

- Femoral Component Alignment 68
- Tibial Component Alignment 73
- Future Prospects for More Accurate Alignment During TKA 75

6. Patient's Anatomy: To Change or To Reconstruct? 79
Johan Bellemans

- Constitutional Alignment 80
- Gender and Morphotype 82

7. Alignment and Biomechanics: A Surgeon's Perspective 85
Thomas Luyckx, Jan Victor

- Joint Line in the Native Knee 86

- Joint Line in the Replaced Knee 89
- Joint Line in Revision TKA 89
- Joint Line Changes and Its Consequences 90

8. The Impact of the Foot on Weight Bearing Alignment 95
Craig S Radnay, Norman W Scott

- Physical Examination 96
- Foot Deformity and Knee Alignment 99
- Posterior Tibial Tendon Dysfunction 100
- Cavovarus Deformity 101
- Post-traumatic Deformity 102
- Neuroarthropathy 103
- Ankle Arthritis 103
- Foot Deformity and Knee Arthroplasty 106

9. Intra-articular Impact of Extra-articular Alignment Deformity 111
Kenneth A Krackow, Mohan K Puttaswamy, Sridhar R Rachala

- Assessment of the Deformity 112
- Impact of Extra-articular Deformity on the Alignment of the Knee 113
- Technical Considerations 113
- Case Illustrations 115
- Surgical Issues 115
- Review of Literature 116
- Sagittal Plane and Rotational Deformities 117

10. Navigation in Knee Arthroplasty 121
William J Hozack, SM Javad Mortazavi

- Preoperative Planning 122
- Anatomy Registration 123

11. Mimics Software in Knee Arthroplasty.....131
Louis Keppler, Joyce Van den Broeck

- Accuracy in Knee Arthroplasty 132
- Mimics 133
- Postoperative Analysis 145

12. Patient Specific Instruments: Past, Present and Future.....149
Mahmoud A Hafez

- The Past 150
- Patient Specific Instruments 157
- The Present 159
- Future Direction 164

13. MRI and CT-based Cutting Guides Type MyKnee 169
Peter P Koch

- Scientific Basis of MyKnee® 170
- MyKnee® Preoperative Planning 171
- Myknee® Cutting Guides 172
- Myknee® Interactive Website 173
- Myknee® Surgical Technique 175
- MyKnee® Benefits 178
- MyKnee® Specials 179
- Personal Experience and Preliminary Results 180

14. MRI and CT-based Pinning Guides Type Signature 183
Anneleen Van Assche, Emmanuel Thienpont

- System Philosophy and Scientific Basis 184
- Strategic Choices of the System 186
- Technical Aspects of the System 186
- Signature™ Planning Software 188
- Quality Control 189
- Production of the Guides 193
- Contact Surface of the Guides 194
- Lead Time of the System 196
- Patient's Anonymity 197
- Intraoperative Use of the Guides 198
- Practical Administrative Considerations—A Team-based Approach 204

15. Kinematically Aligned TKA with MRI-based Cutting Guides 207
Stephen M Howell, Maury L Hull

- The Three Axes that Describe the Kinematics of the Knee 209
- A Simple Method for Finding the Three Kinematic Axes 210
- Use of Shape-Matching to Kinematically Align the Femoral Component 212
- Penalty from Aligning the Femoral Component Perpendicular to the Mechanical axis of the Femur is 'Kinematic Malalignment' 214
- Method of Kinematically Aligning the Total Knee Arthroplasty with Use of Patient Specific Cutting Guides 216
- Protocol for Aligning and Obtaining MRI of the Knee 217
- Virtual Construction of the 3-Dimensional 'Arthritic' and 'Normal' Knee Model 218
- Virtual Shape-Matching the Femoral and Tibial Components 219
- Function, Design, and Machining of Patient Specific Cutting Guides 220
- Simple Algorithm for Restoring Motion and Balancing the Kinematically Aligned Total Knee Arthroplasty 220
- Surgical Technique for Kinematically Aligning the TKA with Patient Specific Cutting Guides 222
- Kinematically Aligned TKA Enables a High Level of Early Satisfaction and Rapid Recovery 226

- A Prediction of the Long-Term Clinical Outcome of Kinematically Aligned TKA 227
- Contact Kinematics Approach Normal in Kinematically Aligned TKA 229

16. MRI-based Pin Guide Patient Specific Instruments 233
Vincent Y Ng, Michael A McShane

- Advantages and Disadvantages of Customization and Patient Specific Instrumentation 234
- Anatomical Landmarks for Preoperative Planning 236
- Surgical Planning with Preoperative Software 243
- Authors' Surgical Technique for TKA Using Patient Specific Instrumentation 247

17. Full Leg and MRI-based Cutting Guides Type Visionaire 253
Price AM Gallie

- Design Rationale and Planning 254
- Surgical Technique 259
- Experiences and Results 261
- Discussion 261

18. CT-based Cutting Guides Type Prophecy.....265
David K DeBoer

- Prophecy® Preoperative Navigation 266

19. CT-based Cutting Guides Type TruMatch.....279
William D Bugbee, Luke Aram

- Overview of the TruMatch™ System 280
- Rationale for the Use of Computerized Tomography 283
- Potential Advantages 284
- Surgical Procedure 284
- Results 285

20. Individualized Total Knee Arthroplasty.....289
Jong Lee, John Slamin, Wolfgang Fitz

- System Philosophy and Design Rationale 290
- Technical Aspects of the System 297
- Intraoperative Use of the Guides 299

21. Unicompartmental Arthroplasty with Patient Specific Guides 305
Andrew Price, Will Jackson, Ben Kendrick, Sam Weston-Simons, Christopher Dodd, David Murray

- Importance of Medial Oxford Implantation Position 306
- Advanced Methods for Improving Alignment 307
- Patient Specific Guides for the Oxford UKA 307
- Patient Specific Implantation—Benefits for UKA Implantation 309
- Experience with Oxford Signature— Initial Results and Future Plans 310

22. Unicompartmental Arthroplasty with Patient Specific Instruments for the Zimmer Unicompartmental High Flex Knee 311
Richard V Williamson, Anthony P Romano

- Advantages and Disadvantages of Patient Specific Instruments 312
- Surgical Preoperative Planning 313
- Surgical Technique 315
- Discussion 315

23. Robotic Knee Arthroplasty Type MAKO Plasty 317
Martin W Roche, Harry E Rubash

- Causes of Failure due to Surgical Error 319
- Haptic Robotics 321
- Surgical Technique 323
- Clinical Studies 333

24. Patient Matched Robotic Unicondylar Arthroplasty 345
Justin P Cobb

- The Platform Technology: Bone Sculpting Abilities of the Sculptor Robot 346
- Background Understanding: The Morphology and Kinematics of the Normal Knee 346
- Reconstructive Surgery: A New Range of Minimally Invasive Devices 351
- Health Economics 352

25. PSI as a Teaching Tool 353
S David Stulberg

- The Rationale for the Use of PSI as a Training Tool for Total Knee Arthroplasty 354
- The Use of PSI as a Teaching Tool 355

26. Soft Tissue-based Alignment with E-Libra 361
Stefan Kreuzer, Ken Johannaber, Leo Beckers

- Soft Tissue Influence on Knee Kinematics and Stability 362
- Soft Tissue-Guided Alignment: Theory and Technique 365
