Contents

Section 1: GENERAL BACTERIOLOGY

Chapter 1 Glossary of Microbiology....3

Chapter 2 History and Scope....10

Microbiology 12
Application to Health 12

Chapter 3 Morphology of Bacteria....15

Slime Layer 16
Capsule 17
Cell Wall 17
Cytoplasmic Membrane 19
Cytoplasm 20
Flagella 21
Fimbriae 22
Spores 23
Unstained Preparations 26
Staining of Bacteria 26
Gram's Stain 26
Acidic Acridine Orange Stain 27
Albert Stain 27
Ziehl-Neelsen Stain 27
Spore Stain 27
Capsular Stain 28

Chapter 4 Nutritional Requirements of Bacteria....29

Growth Requirements 29
Growth Curve 30
Bacterial Reproduction 32
Generation Time 32

Chapter 5 Media for Bacterial Growth....33

Fluid Media 33
Solid Media 34
Methods of Anaerobic Culture 37

Chapter 6 Classification and Identification of Bacteria....40

Development of Rapid Methods for Identification of Organisms 44

Chapter 7 Sterilization and Disinfection....46

Application of Disinfectants 46
Autoclave 48
Evaluation Tests of Disinfectant 52
Prion 53

Chapter 8 Infection....54

Chapter 9 Antimicrobial Therapy....57

Chapter 10 Bacterial Genetics....61

Structure of DNA 61
Plasmid 63
Episomes 63
Genotypic and Phenotypic Variations 63
Transmission of Genetic Material 64

Section 2: IMMUNOLOGY

Chapter 11 Immunity....69

Historical Events in Immunology 69
Application of Immunology 70
Immunity 70
Innate Immunity 70
Acquired Immunity 73
Vaccination 74
Newer Vaccines 76
Application of Vaccine 76

Chapter 12 Antigen....77

Properties of Antigen 77
Superantigen 79

Chapter 13 Antibodies—Immunoglobulins....80

Immunoglobulins 80

Chapter 14 Antigen and Antibody Reaction....85

Precipitation 85
Lattice Hypothesis 85
Agglutination Reactions 87
Technique of Agglutination Test 87

Chapter 15 The Complement System....90

Conglutinin 93

Chapter 16 Structure and Functions of Immune System....94

Organs Producing Antibody 94
Central Lymphoid System 94
New Classification of T-cells 94

Chapter 17 The Immune Response....100

Humoral Immune Response 100
Factors Influencing Antibody Production 101
Theories of Antibody Production 101
Cellular Immune Response 102
Cytokines 102
Lymphokines 102

Interleukins 103
Detection of CMI 104
Scope of Cell Mediated Immunity 104

Chapter 18 Hypersensitivity.....105

Type I Reactions 106
Atopy 108
Type II Reactions 109
Type III Reactions 110
Delayed Hypersensitivity (Type IV Reaction) 110
Classical Type 111
Granulomatous Reactions 111
Schwartzman Reaction 111

Chapter 19 Immunohematology.....112

Chapter 20 Miscellaneous.....115

Immune Deficiency Syndrome 115
Acquired Immune Deficiency Syndrome (AIDS) 116
Autoimmune Diseases 116
Features Observed in Autoimmune Diseases 117
Immunology of Transplantation 117
Immunological Surveillance 119
Immunological Tolerance 119

Section 3: SYSTEMATIC BACTERIOLOGY

Chapter 21 *Staphylococcus*.....123

Micrococcaceae 123
Staphylococcus aureus (Staphylococcus pyogenes) 123
Biotypes 126
Methicillin Resistant Staphylococcus aureus 129
Staphylococcus saprophyticus 129
Staphylococcus albus 129
Staphylococcus citreus 130
Micrococcus tetragenus (*Gaffkya tetragena*) 130

Chapter 22 *Streptococcus*.....131

Group A 132
Streptococcus pyogenes 132
Group B 136
Group C 136
Group D 136
Alpha Hemolytic Streptococci 137
Anaerobic Streptococcus 138

Chapter 23 *Pneumococcus*.....139

Chapter 24 *Neisseria*.....143

Neisseria meningitidis 143
Neisseria gonorrhoeae 144

Chapter 25 *Corynebacterium*.....148

Corynebacterium diphtheriae 148
Diphtheroids 152

Chapter 26 Mycobacteria.....153

Mycobacterium tuberculosis 153
Atypical Mycobacteria 161
Skin Pathogens 162
Mycobacterium leprae 162
Mycobacterium leprae murium 165

Chapter 27 *Bacillus*.....166

Bacillus anthrax 166
Bacillus subtilus 168
Bacillus cereus 169

Chapter 28 *Clostridium*.....170

Clostridium tetani 170
Clostridium perfringens (*Clostridium welchii*) 173
Nagler's reaction 174
Clostridium botulinum 175
Clostridium difficile 176

Chapter 29 Spirochetes.....178

Borrelia 178
Lyme Disease 179
Leptospira 179
Treponema 181

Chapter 30 Miscellaneous Bacteria.....185

Mycoplasmataceae 185
Mycoplasma 185
Mycoplasma pneumoniae (*Eaton's Agent*) 185
Actinomycetes 187
Actinomyces 187
Nocardia 188
Actinomycotic Mycetoma 188
Listeria monocytogenes 188
Erysipelothrix insidiosa 189
Streptobacillus moniliformis 189
Spirillum minus 189
Donovania Granulomatis 188
Lactobacilli 189
Nonsporing 190

Section 4: ORAL MICROBIOLOGY

Chapter 31 An Introduction....195

Effects of Oral Flora 195

Chapter 32 Normal Oral Microbial Flora....197

Normal Flora of Respiratory Tract 197

Chapter 33 Dental Plaque and Dental Caries....199

Formation of Dental Plaque 199
Structure of Dental Plaque 199
Microbes Responsible for Dental Caries 199
Prevention of Dental Caries 200

Chapter 34 Periodontal Diseases....201

Acute Ulcerative Gingivitis 201
Chronic Periodontitis 201
Localized Juvenile Periodontitis 201
Acute Necrotizing Ulcerative Gingivitis 201

Chapter 35 Endodontic Infections....203

Source of Infection 203
Etiology 203

Chapter 36 Miscellaneous Oral Infection....204

Herpes Virus Infection 204
Coxsackie Virus Infection 204
Measles Virus 205
Papillomavirus Infection 206
Bacterial Oral Miscosal Infections 206

Section 5: VIROLOGY

Chapter 37 General Characteristics of Viruses....211

Inclusion Bodies 217
Laboratory Diagnosis 217

Chapter 38 Classification of Viruses....219

Chapter 39 DNA Viruses....223

Pox Virus 223
Smallpox (Variola major) 224
Molluscum Contagiosum 225
Adenoviruses 226

Chapter 40 RNA Viruses.....230

Picornaviruses A 230
Orthomyxoviruses 231
Influenza Viruses 231
Paramyxoviruses 232
Rubella Virus 233
Rhabdovirus 234

Chapter 41 Severe Acute Respiratory Syndrome.....236

Clinical Picture 237
Laboratory Diagnosis 237
Management 237

Chapter 42 Acquired Immuno Deficiency Syndrome.....238

Important Events in Acquired Immuno Deficiency Syndrome 238
Strategies of HIV testing in india 243

Chapter 43 Miscellaneous Viruses.....244

Section 6: MYCOLOGY

Chapter 44 Mycology.....255

Morphological Classification of Fungi 255
Systematic Classification 255
Laboratory Diagnosis 256
Subcutaneous Mycosis 256
Systematic Mycosis 258

Section 7: PARASITOLOGY

Chapter 45 Introduction.....265

Taxonomy and Classification 265
History in Brief 266
Parasite 267
Host 267
Mechanisms of Disease Production by Parasites 268
Reaction of the Host to Parasite 268

Chapter 46 Protozoa.....269

Rhizopoda 269
Entamoeba histolytica 269
Serological Tests in Invasive Amebiasis 272
Mastigophora 273
Giardia lamblia 273
Trichomonas vaginalis 274
Trichomonas tenax 275
Trichomonas hominis 276
Sporozoa 276
Malarial Parasite 276
Isospora belli 281
Parasites Associated with AIDS 282

Chapter 47 Helminths....283

Ascaris lumbricoides (*Roundworm*) 283
Ancylostoma duodenale (*Hookworm*) 284
Necator americanus 284
Enterobius vermicularis (*Threadworm*) 285
Wuchereria bancrofti 285
Cestodes 286
Taenia saginata (*Beef Tapeworm*) 287
Taenia solium (*Pork Tapeworm*) 288
Cysticercus cellulosae 289
Echinococcus granulosus (*Dog Tapeworm*) 289
Echinococcus multilocularis 291

Section 8: CLINICAL MICROBIOLOGY

Chapter 48 The Normal Flora....295

Chapter 49 Collection and Transport of Clinical Specimens....297

Chapter 50 Collection and Preliminary Processing of Specimens....299

Chapter 51 Diagnostic Microbiology—An Approach to Laboratory Diagnosis....301

Pyrexia of Unknown Origin 302
Sore Throat 303
Urinary Tract Infection 303
Meningitis 305
Infective Diarrhea 305
Wound Infection 306
Pulmonary Tuberculosis 308
Septicemia/Bacteremia 309

Chapter 52 Serological and Skin Tests....311

Chapter 53 Microbiology in the Service of Human Being....314

Medical Microbiology 314
Role of Microbiology 314
Importance in Diagnosis of Infectious Disease 315

Chapter 54 CommunityMicrobiology....316

Chapter 55 Emerging and Re-emerging Microbial Diseases....318

Emerging Microbial Diseases 318
Pandemic of Swine Flu (H_1N_1) Outbreak of April 2009 319
Re-Emerging Microbial Diseases 320
Factors Responsible for Emerging and Re-Emerging of Microbial Diseases 320

Chapter 56 Nosocomial Infections....321

Patients Requiring Isolation 321
Hospital Infection and Prevention 321
Epidemiological Markers Useful in Investigating Hospital Infection 322
Prevention of Nosocomial Infections 322
Factors Responsible for Hospital Infections 322
Sources of Hospital Infection 322
Mode of Infection 322
Outline of Investigative Approach of Hospital Infection Outbreak 323

Chapter 57 Hospital and Laboratory Waste.....324

Infectious Waste of Hospital and Laboratory 324
Infectious Microorganisms Associated with Hospital or laboratory 324
Segregation of Hospital Waste 324
Techniques for Waste Treatment 325
Disposal of Hospital and Laboratory Waste 326

Chapter 58 Diagnostic Virology.....327

Chapter 59 Emergency Microbiology.....329

Visualization of the Agent of Disease 329
Antigen Detection 329

Chapter 60 Hand Hygiene in Dentistry.....331

History 331
Indications of Hand Washing 331
Normal Bacterial Skin Flora 331
Physiology of Normal Skin 332
Store of Hand Care Products 332
Hand Washing Techniques 332
Use of Alcohol Hand Rub 332
Hand Washing with Liquid Soap (Antiseptic) 333
Surgical Hand Washing 333

Index..... 335
