CONTENTS

Chapter 1 Mood Disorder 1

- Signs and Symptoms 3
  - Normal Grief (Bereavement) 3
  - Complicated Grief 3
  - Depression due to a General Medical Condition 3
  - Major Depression 5
  - Dysthymic Disorder 7
  - Minor Depression 7
  - Depressive Personality Disorder 8
  - Bipolar Affective Disorder 8
  - Mixed Mood Disorder 9

Chapter 2 Anxiety and Late Life Psychosis 10

- Situational Anxiety 12
- Adjustment Anxiety 12
- Generalized Anxiety Disorder 12
- Phobias 13
- Obsessive-Compulsive Disorder 13
- Panic Disorders 14
- Post-traumatic Stress Disorder 14
- Late-Life-Onset Psychosis 15

Chapter 3 Headache 17

- Primary Headache in Elderly 17
  - Migraine 17
  - Tension Type Headache 19
  - Cluster Headache 19
  - Chronic Daily Headache 20
  - Other Primary Headaches in the Elderly 20
  - Trigeminal Neuralgia 21
- Secondary Headache in the Elderly 22
  - Intracranial Lesion 23
  - Metabolic Headache 24
- Diagnostic Approach 24

Chapter 4 Chronic Pain 26

- Definition and Classification 26
  - Classification—Traditionally it is Divided 27
- Mechanism of Chronic Pain 27

- Barriers to Effective Pain Assessment in Older Patient 29
  - Patient Related Barrier 29
  - Social and Institutional Barrier 29
  - Health Professional Barrier 29
- Assessment of Chronic Pain 29
  - Sample Questions in Pain Interview 30
  - Physical Examination 31
  - Functional Status 31
  - Psychological and Social Assessment 31

Chapter 5 Sleep Disorders 33

- Primary Sleep Disorders 34
  - Restless Leg Syndrome (RLS) and Periodic Limb Movements in Sleep (PLMS) 36
  - Rapid Eye Movements (REM) Sleep Behavior Disorder 36
  - Insomnia 37
  - Circadian Rhythm Disturbances 37
  - Narcolepsy 38
  - Sleep and Menopause 38

Chapter 6 Epilepsy 40

- Causes 40
- Neuropsychiatric Aspects of Epilepsy 42
  - Psychosocial Impact of Seizures 42
  - Neuropsychological Impact of Seizure 42
  - Ictally Related Behavioral Alterations 43
  - Interictal Psychopathology 44
- Diagnosis and Management 44

Chapter 7 Stroke 48

- Pathogenesis 49
- Ischemic Stroke 49
- Risk Factors 50
- Neurological Symptoms/Signs 51
- Management 54
- Prevalence of Post-stroke Neuropsychiatric Disorders 55
  - Post-stroke Depression (PSD) 55
  - Post-stroke Anxiety (PSA) 56
  - Post-stroke Catastrophic Reactions 56
  - Emotional Incontinence 56
  - Post-stroke Psychosis 56
- Hemorrhagic Stroke 57

Chapter 8 Parkinsonism..... 60

- Classification and Diagnosis of Parkinsonism 60
  - Stages in the Diagnosis of Parkinsonism 61
- Parkinson's Disease 62
  - UK Parkinson's Disease Society Brain Bank's Criteria for Clinical Diagnosis of Possible Parkinson's Disease 62
  - Bradykinesia 63
  - Tremor 64
  - Rigidity 65
  - Posture 65
  - Postural Instability 66
  - Freezing of Gait 66
  - Other Motor Features of PD 67
  - Non-motor Features 68
- Approach to Parkinsonism 68
  - History 68
  - Examination 68
  - Parkinson's Disease and Parkinsonism 71
  - Parkinson's Plus Syndrome 71
  - Parkinson's Minus 72
  - Tremor Dominant PD 72
  - Lower Body Parkinsonism 72
  - Malignant Parkinsonism 73
  - Atypical Features Suggesting Diagnoses other than PD 73
  - Conditions Mimicking Parkinsonism in Elderly 75
  - Diagnosis of Parkinsonism 76

Chapter 9 Dementing Disorder..... 78

- Treatable Causes of Dementia 80
  - Normal Pressure Hydrocephalus 80
  - Chronic Subdural Hematoma 81
  - Benign Tumours 82
  - Metabolic and Endocrine Disorders 82
  - Deficiency States 83
  - Infections 83
  - Dementia Evaluation 84
- Diagnosis of Dementia 85
  - Neurological Signs in Dementia 86
  - Clinical Differentiation of the Major Dementias 88
  - Cognitive Assessment of Dementia 89

- – Neuropsychiatric Assessment of Dementia 89
- – Laboratory Evaluation 90
- – Electroencephalography 91
- – Neuroimaging 92

Chapter 10 Traumatic Brain Injury 93

- • Secondary Damages to the Brain Following Traumatic Brain Injury 95
  - – Loss of Consciousness 96
  - – Post-traumatic Amnesia 96
  - – Concussion (An Alteration of Conscious Awareness after Head Trauma) 96
  - – Encephalopathy 97
  - – Seizure 97
  - – Pupillary Inequality 97
- • The Adverse Influence of Age on Traumatic Brain Injury 97
- • Neuro-radiological Data in the Aging Brain Versus Trauma 98
- • Genetic Association with TBI Outcome 101
- • Neuropsychiatric Consequences of Geriatric Traumatic Brain Injury 101
- • Latest Medical Researches 103
  - – New Marker for TBI 103
  - – Sleep Medications 103
  - – Probability of Late Onset Seizures 104
  - – Blood Test Predicts Brain Injury Outcome 104
  - – The Benefits of Alpha Lipoic Acid in TBI 104
  - – Positive Effects of Hemoglobin Solution 104
  - – Accelerated Damage in Elderly 105
  - – Watch Your Pituitary 105
  - – Stem Cells Repair in TBI 105
  - – Combination Therapy 106

Chapter 11 Central Nervous System Infection 112

- • Causes of Central Nervous System Infection in Elderly Patients 112
  - – Acute Bacterial Meningitis 113
  - – Brain Abscess 114
  - – Chronic Meningitis 115
  - – Viral Infection 116
  - – Prion Disease (Subacute Spongiform Encephalopathies) 119
  - – Neurosyphilis 121
  - – General Paresis 122
  - – Postinfectious Syndrome 122

Chapter 12 Neoplastic Disorder 123

- Signs and Symptoms of Brain Tumors 124
- Diagnosis and Management of Brain Tumors 127

Chapter 13 Nerve and Muscle Disorder 136

- Diagnosis and Management 137

Chapter 14 Sphincter Disturbances 142

- Urinary Incontinence 142
  - Implication of Incontinence 142
  - Basic Mechanisms 143
  - Evaluation 144
  - Management 146
- Fecal Incontinence—Inability to Control Bowel Functions Voluntarily 148
  - Management 148

Chapter 15 Gait Disorder 151

- Etiological Classification and Clinico-anatomical Correlation 152
  - Lowest–Level Gait Disturbances 153
  - Middle-Level Gait Disturbances 153
  - Highest–Level Gait Disturbances 153
- Evaluation and Assessment of Gait Disorder 155
  - Examination of Gait and Balance 156
  - Laboratory Investigations 156
- Management Goal 157

Chapter 16 Neurological Consequences of Non-neurological Disorder 159

- Cardiopulmonary Disorders 159
  - Subacute and Chronic Encephalopathy 160
  - Acute Anoxic Ischemic Encephalopathy 160
- Pulmonary Encephalopathy 160
- Renal Disorders 161
- Dyselectrolytemia 162
- Endocrine Disorders 163
- Hepatic Disorders 164
- Hematological Disorders 164
- Paraneoplastic Neurologic Disorders (PND) 165
- Critical Care Disorders of Nervous System 166

Chapter 17 Complex Issues in Managing Illness in the Elderly 168

- Primary and Secondary Prevention of Geriatric Illness 169

Chapter 18 Miscellany 172

- Global Disorders of Consciousness 172
- Posthypoxic Neurologic Syndromes 173
- Complications of Generalized Convulsive Status Epilepticus 174
- Causes of Acute Amnesia 175
- Cardinal Features of Acute Confusional State 176
- Causes of Acute Confusional State 176
- Symptoms in Patients with Dizziness and Vertigo 177
- Common Neurological Signs in Normal Aging 178

Index 179
