Contents

PATHOLOGY

Section I: The Cell In Health and Disease

1. Introduction to Pathology 8
2. Techniques for the Study of Pathology 8
3. Normal Cell Structure and Function 8
4. Etiology and Pathogenesis of Cell Injury 8
5. Morphology of Cell Injury 8
6. Intracellular Accumulations 9
7. Amyloidosis 10
8. Genetic and Pediatric Diseases 10
9. Environmental and Nutritional Diseases 11

Section II: Inflammation and Healing, Immunity and Hypersensitivity, Infections and Infestations

10. Acute and Chronic Inflammation 11
11. Granulomatous Inflammation 13
12. Healing of Tissues 14
13. Immunity and Hypersensitivity 15
14. Infections and Infestations 15

Section III: Fluid and Hemodynamic Disorders

15. Derangement of Body Fluids and Electrolytes 15
16. Circulatory Disturbances due to Deranged Volume 16
17. Circulatory Disturbance of Obstructive Nature 17
18. Ischemia and Infarction 17

Section IV: Growth Disorders and Neoplasia

19. Cellular Adaption 18
20. General Aspects of Neoplasia 19
21. Etiology and Pathogenesis of Neoplasia 19
22. Clinical Aspects of Neoplasia 20
23. Common Specific Tumors 20

Section V: Hematology and Lymphoreticular Tissues

24. Introduction to Hematopoietic System and Disorders of Erythroid Series 21

25. Disorders of Platelets, Bleeding Disorders and Basic Transfusion Medicine 22
26. Disorders of Leukocytes and Lymphoreticular Tissues 23

Section VI: Selected Topics from Systemic Pathology

27. Diseases of Cardiovascular System 24
28. Diseases of Oral Cavity and Salivary Glands 25
29. Jaundice, Viral Hepatitis, Cirrhosis 26
30. Lung Cancer 26
31. Systemic Hypertension 26
32. Diabetes Mellitus 26
33. Common Diseases of Bones 26

Section VII: Miscellaneous

34. Basic Diagnostic Cytopathology 27
35. Function Tests 27
36. Normal Values 27

Section VIII: Clinical Pathology

MICROBIOLOGY

1. General Microbiology 36
2. Immunology 38
3. Systemic Bacteriology 40
4. Viriology 43
5. Mycology 44
6. Parasitology 45
7. Oral Microbiology 45
8. Clinical Microbiology 46

PHARMACOLOGY

Section I: General Pharmacology

1. Introduction and Source of Drugs 55
2. Routes of Drug Administration 55
3. Pharmacokinetics 56
4. Pharmacodynamics 57
5. Adverse Drug Reactions, Drug Interactions, Drug Nomenclature and Essential Drug Concept 58

Section II: Autonomic Nervous System

6. Introduction to Autonomic Pharmacology 58
7. Cholinergic System 58

8. Anticholinergic Drugs 59
9. Skeletal Muscle Relaxants 60
10. Adrenergic System 60
11. Adrenergic Antagonists 61

Section III: Drugs Acting on the Kidney

12. Diuretics and Antidiuretics 62

Section IV: Cardiovascular System

13. Cardiac Glycosides and Treatment of Cardiac Failure 63
14. Calcium Channel Blockers 64
15. Antiarrhythmic Drugs 64
16. Drugs Used in Angina Pectoris and Myocardial Infarction 65
17. Antihypertensive Drugs 65
18. Plasma Expanders and Pharmacotherapy of Shock 66

Section V: Central Nervous System

19. General Anesthetics 66
20. Local Anesthetics 68
21. Sedative Hypnotics 69
22. Alcohols 70
23. Antiepileptics 70
24. Drugs Used in Parkinsonism 71
25. Opioid Analgesics 71
26. Nonsteroidal Anti-Inflammatory Drugs 72
27. Drugs Used in Rheumatoid Arthritis and Gout 73
28. Drugs Used in Psychiatric Disorders 73
29. CNS Stimulants 73

Section VI: Autocoids

30. Autocoids 74

Section VII: Respiratory System

31. Drugs Acting on Respiratory System 74

Section VIII: Blood

32. Hematopoietic System 75

Section IX: Gastrointestinal Tract

33. Drugs Used in the Gastrointestinal Disorders 77

Section X: Chemotherapy I

34. General Considerations 79
35. Sulfonamides, Cotrimazole and Quinolones 80

36. Beta-lactam Antibiotics 81
37. Broad Spectrum Antibiotics 82
38. Aminoglycosides 83
39. Macrolides, other Antibacterial Agents and Chemotherapy of Urinary Tract Infections 83

Section XI: Chemotherapy II

40. Chemotherapy of Tuberculosis and Leprosy 84
41. Antifungal Drugs 85
42. Antiviral Drugs 85
43. Chemotherapy of Malaria 85
44. Drugs Used in Amoebiasis, Leishmaniasis, and Trypanosomiasis 86
45. Antihelminthics 86
46. Cancer Chemotherapy 86

Section XII: Hormones

47. Hypothalamus and Anterior Pituitary Hormones 87
48. Thyroid Hormones and Antithyroid Drugs 87
49. Corticosteroids 87
50. Estrogen, Progestins and Hormonal Contraceptives 88
51. Androgens and Anabolic Steroids 88
52. Insulin and Oral Hypoglycemics 88
53. Agents Affecting Bone Mineral Turnover 90

Section XIII: Miscellaneous Drugs

54. Miscellaneous Drugs 90

Section XIV: Dental Pharmacology

55. Dental Pharmacology 91
56. Treatment of Emergencies 93

DENTAL MATERIALS

1. Dentistry and Dental Materials 101
2. Basic Nature and Properties of Dental Materials 101
3. Biological Considerations of Dental Materials 103
4. Tarnish and Corrosives 103
5. Introduction to Restorations, Luting and Pulp Therapy 104
6. Cavity Liners and Varnish 105
7. Dental Cements 105
8. Dental Amalgam 108
9. Direct Filling Gold 111
10. Composite Resins and Bonding Agents 112
11. Rigid Impression Materials 115

12. Elastic Impression Materials—Agar and Alginate 116
13. Elastomeric Impression Materials 118
14. Introduction to Model, Cast and Die Materials 118
15. Gypsum Products..... 119
16. Waxes in Dentistry 121
17. Dental Casting Investments 122
18. Casting Procedures..... 124
19. Dental Casting Alloys 126
20. Abrasion and Polishing 127
21. Dental Ceramics..... 128
22. Wrought Alloys 130
23. Brazing and Welding 130
24. Dental Implant Materials 132
25. Denture Resins and Polymers 132
