Contents

ANATOMY

Section I: General Anatomy

Section II: Anatomy

Part I: Head and Neck

1. Osteology of the Head and Neck 9
2. Scalp, Temple and Face 12
3. The Side of the Neck 14
4. The Back of the Neck 15
5. Contents of the Vertebral Column 15
6. The Cranial Cavity 16
7. Contents of the Orbit 17
8. Anterior Triangle of the Neck 18
9. The Parotid Region 19
10. Temporal and Infratemporal Fossa 20
11. The Submandibular Region 23
12. Deep Structures in the Neck 24
13. The Prevertebral Region 25
14. The Mouth and Pharynx 25
15. The Nose and Paranasal Sinuses 27
16. The Larynx 30
17. The Tongue 31
18. The Ear and Vestibulocochlear Nerve 32
19. The Eyeball 32
20. Surface Marking, Radiological and Imaging Anatomy 32

Part II: Brain

1. Introduction 32
2. Meninges of the Brain and Cerebrospinal Fluid 32
3. Spinal Cord 32
4. Cranial Nerves 33
5. Brainstem 34
6. Cerebellum 34
7. Fourth Ventricle 34
8. Cerebrum 34
9. Third Ventricle, Lateral Ventricles and Limbi System 34
10. Some Neural Pathways and Reticular Formation 34
11. Blood Supply of Spinal Cord and Brain 35
12. Surface and Radiological Anatomy 35

Part III: Upper Limb
Part IV: Thorax
Part V: Abdomen

Section III: Embryology

Section IV: Histology

PHYSIOLOGY

1. General Physiology 51
2. Blood and Body Fluids 51
3. Muscle Physiology 54
4. Digestive System 55
5. Renal Physiology and Excretion 57
6. Endocrinology 59
7. Reproductive System 63
8. Cardiovascular System 64
9. Respiratory System 67
10. Nervous System 69
11. Special Senses 72

BIOCHEMISTRY

1. Bimolecules and the Cell 83
2. Carbohydrates 83
3. Lipids 84
4. Proteins and Amino Acids 85
5. Nucleic Acid and Nucleotides 86
6. Enzymes 87
7. Vitamins 89
8. Digestion and Absorption 91
9. Plasma Proteins 91
10. Hemoglobin and Porphyrins 92
11. Biological Oxidation 92
12. Introduction to Metabolism 92
13. Metabolism of Carbohydrates 93
14. Metabolism of Lipids 94
15. Metabolism of Amino Acids 96
16. Integration of Metabolism 97
17. Metabolism of Nucleotides 97
18. Mineral Metabolism 98
19. Hormones 99
20. Organ Function Tests 99
21. Water, Electrolyte and Acid-Base Balance 100

22. Tissue Proteins and Body Fluids 100
23. Nutrition 100
24. DNA—Replication, Recombination and Repair 101
25. Transcription and Translation 101
26. Regulation of Gene Expression 101
27. Recombinant DNA Technology 101
28. Human Genome Project 101
29. Gene Therapy 101
30. Bioinformatics 102
31. Metabolism of Xenobiotics (Detoxification) 102
32. Prostaglandins and Related Compounds 102
33. Biological Membranes and Transport 102
34. Free Radicals and Antioxidants 102
35. Environmental Biochemistry 102
36. Insulin, Glucose Homeostasis and Diabetes Mellitus 102
37. Cancer 103
38. Acquired Immunodeficiency Syndrome (AIDS) 103
39. Introduction to Bioorganic Chemistry 103
40. Overview of Biophysical Chemistry 103
41. Tools of Biochemistry 103
42. Immunology 103
43. Genetics 103

DENTAL ANATOMY AND DENTAL HISTOLOGY

Section I: Structure of Oral Tissues

1. Enamel 111
2. Dentine 113
3. Pulp 115
4. Cementum 117
5. Periodontal Ligament 118
6. Alveolar Process 120
7. Salivary Glands 121
8. Oral Mucous Membrane 123
9. Temporomandibular Joint 126
10. Maxillary Sinus 126
11. Histological Techniques and Methods 127

Section II: Development of Tooth and Formation of Hard Tissues of the Teeth

1. Development of Tooth 128
2. Amelogenesis 130
3. Dentinogenesis 130
4. Cementogenesis 130
5. Eruption and Shedding 130

Section III: Basic Embryology and Embryology of Orofacial Structures

1. The Human Cell 131
2. Cell Division 131
3. Fertilization 132
4. The Brachial Apparatus 132
5. Development of Face 132
6. Development of Palate 132
7. Development of Tongue 132
8. Development of Salivary Glands 133
9. Development and Growth of Mandible and Maxilla 133

Section IV: Oral Physiology

1. Hormones and Oral Tissues 133
2. Vitamins and Oral Tissues 134
3. Calcium Metabolism 134
4. Occlusion 134
5. Mastication 135
6. Deglutition 135
7. Pain 136
8. Speech 136

Section V: Dental Anatomy

1. Introduction 136
2. The Different Dentitions 136
3. Tooth Surfaces and Regions 136
4. Terminologies Used in Dental Anatomy 137
5. Chronology of the Dentitions 138
6. Significance of Deciduous Teeth 139
7. Differences Between Deciduous and Permanent Teeth 139
8. Deciduous Tooth Morphology 140
9. Permanent Tooth Morphology 140
10. Identification of Teeth 142
11. The Extremes 142
12. Common Features in Tooth Morphology 142
13. Blood Supply, Nerve Supply and Lymphatic Drainage of Teeth 142
14. Occlusion 143
