Contents

SECTION 1 THE PROJECT OF VISION: HYPOTHESIS FOR A FUNCTIONAL STRUCTURE

1. A New Winning Philosophy **3**
Roberto Pinelli

- The Vision Institute *3*
- Structure of the New Vision Institute *4*
  - The Medical Staff *4*
  - The Front Desk Staffm *4*
  - The External Relations Department between Information and Marketing *5*
  - Breaking News: The Patient Care Staff *7*
- A Management Hypothesis on Daily Briefing: Contacts between Medical and Nonmedical Staff (Analyzing the Daily Patients' Agenda) *7*

2. Highlights on Statistics and Clinical Research **10**
Roberto Pinelli

- External Relations for Surgical and Clinical News *10*
- Cooperation with National and International Scientific Societies *11*

3. New Operative Tools to Improve the Structure **14**
Elena Scaffidi

- Psychology of Vision *14*
  - Specificity of the Ophthalmic Setting *14*
  - Introducing the Concept of Satisfaction as a Multidimensional Variable *17*
- Evaluation of Patient's Satisfaction Questionnaire *19*
  - Preliminary Phase: Investigation Objectives *20*
  - Executive Plan *21*
  - Execution *24*

SECTION 2 OVERVIEW

4. Eye Aberrations: Overview **29**
Tangwa Martin Neville

- Clinical Controller—Istituto Laser Microchirurgia Oculare *29*

5. An Approach to the Wavefront Technology: Aberrometry Basis **32**
Jesús Andrés Rosas Apráez, Juan Pablo Castañeda Borrero, Luis Antonio Ruiz

- Overview and History *32*
- Zernike Polynomials *34*
- Constant Aberrations *35*
- Low Order Aberrations *35*

- Higher-Order Aberrations *36*
  - Objective Visual Quality Measures *38*
  - Pupil Level *38*
  - Retinal Level *39*
  - Aberrometry Limitations *40*
  - Tear Film *40*
  - Pupil Size *40*
  - Chromatic Aberration *40*
  - Aberrometer Sensors Resolution *40*

6. Wavefront Aberrations from A to Z **43**
Yazan A Zahran

- Factors Affect the Optical Quality of the Retinal Image *43*
  - Wavefront Basics *43*
  - Classification of Aberrations *44*
  - Representing Wavefront Aberrations *45*
  - Measurement of Wavefront Aberrations *45*
  - Metrics to Define Image Quality *46*
  - Relationships between Wavefront Aberrations, Point Spread Function and Optical Transfer Function *49*

7. Basic Wavefront Optics and Ocular Aberrations **52**
Vance Thompson

- Wavefront Technology in Clinical Practice *52*
- Wavefront Measuring Devices: Aberrometers *53*
- Analysis of the Wavefront Data *55*

SECTION 3 CLINICAL CASES

8. Corneal Aberrometry Changes Following Intracorneal Ring Segment Implantation **67**
Jorge L Alio, Alfredo Vega Estrada, Pablo Peña-García

9. Monocular Diplopia **79**
José Luis Güell

10. Wavefront Analysis and Scheimpflug Imagery in Diagnosis of Anterior Lenticonus **84**
Peter S Hersh, Yinfei Xu, David S Chu

11. P-curve Clinical Cases **90**
Roberto Pinelli

SECTION 4 ATLAS

12. Wavefront Basic Images **119**
Roberto Pinelli

- Why this Simple and Emblematic Atlas? *119*

Index *123*
