Contents

Section 1: CLINICAL HEMOTHERAPY

Transfusion Practice in Medicine

1. **Transfusion in Bone Marrow Failure Syndromes** 3
   PS Ghalaut, Jitendra Kumar Pehalajani, Arvind Chahal
   - Component Therapy 3
   - Indications for RBC Transfusion 3
   - Indications of Platelet Transfusion 4
   - Granulocyte Transfusion 4
   - Synthetic Oxygen Carriers 5

2. **Transfusion Therapy in Autoimmune Hemolytic Anemia** 7
   Rajesh B Sawant
   - Indications for Transfusion 7
   - Responsibilities of Transfusion Medicine 7
   - Patient Management 8
   - Autoimmune Hemolytic Anemia 8

3. **Sugar Free Antibodies: A New Treatment for Idiopathic Thrombocytopenic Purpura and Autoimmune Hemolytic Anemia** 9
   HS Sandhu, Ishwar Chouhan
   - Sugar Free Antibodies in Immune Thrombocytopenic Purpura 9
   - Sugar Free Antibodies in Autoimmune Hemolytic Anemia 9
   - Sugar Free Antibodies in Other Autoimmune Diseases 11
   - Future 11

4. **Transfusion Practice in Disseminated Intravascular Coagulation** 13
   Hitish Narang
   - Pathophysiology 13
   - Diagnosis 13
   - Treatment 13
   - Prognosis 14

5. **Transfusion Practice in Oncology** 15
   Devinder Singh Sandhu
   - Anemia 15
   - Thrombocytopenia 16
   - Neutropenia 18

6. **Transfusion Practice in Coronary Interventions** 20
   Sudhir Varma
   - Why Bleeding and Excess Morality Post Percutaneous Coronary Intervention? 20
   - Can Blood Transfusion in Percutaneous Coronary Intervention Patients be Harmful? 21

7. **Neurological ICU: Role of Red Blood Cell Transfusion** 24
   BL Bhardwaj, Dharam Paul, Arun Bansal
   - Role of Red Blood Cell Transfusions 24
   - Adverse Effects of Transfusion 25
   - Transfusion in the Neuro-ICU 25

8. **Blood Transfusion Alternatives** 30
   Harnoor Singh Bhardwaj, BL Bhardwaj, Aastha Miranpuri
   - Pharmacological Agents 30
   - Recombinant Hematopoietic Growth Factors 31
   - Red Cell Substitutes 31
   - Platelet Substitute 33

9. **Role of Whole Blood in Transfusion Practice** 35
   Ashok Sharma
   - Indications of Whole Blood Transfusion 35

Transfusion Practice in Surgery

10. **Management of Preoperative Anemia in Patients Undergoing Elective Surgery** 37
    Manisha Shrivastava
    - Prevalence Depends on Many Factors 37
    - Recommendations for Detection, Evaluation and Management of Preoperative Anemia in Orthopedic Surgery [Network for Advancement of Transfusion Alternatives (NATA)] 38

11. **Blood Conservation Strategies** 40
    DP Singh
    - Methods 40

12. **Thromboelastography** 42
    Anupam Verma

13. **Transfusion Support in Cardiac Surgery** 44
    Rajendra K Chaudhary
    - Transfusion Variability in Cardiac Surgery 44
    - Potential Benefits of Red Blood Cell Transfusion in Cardiac Surgery 44
    - Predictors of Allogeneic Red Blood Cell Transfusion during Cardiac Surgery 45

14. **Transfusion Practice in Arthroplasty** 48
    Manuj Wadhwa, Kunal R Patel
    - Recent Studies and Recommendations for Specific Orthopedic Problems 48

15. **Restricting Transfusion Requirements in Major Orthopedic Surgery and its Alternatives** 51
    Ravisha Bhardwaj, RS Boparai
    - Techniques Applicable to Orthopedic Surgery 52
    - Orthopedic Trauma 53
    - Future 53

16. Transfusion Support in Neurosurgery **55**
Sandeep Kundra
- Threshold for Transfusion in Neurosurgery is Uncertain 55
- Blood Conservation Strategies 57

Maternal, Fetal and Neonatal Transfusion Practice

17. Noninvasive Prenatal Screening for Rh Hemolytic Disease **60**
Manjit Kaur Mohi
- Possible Sources of Error 61
- Ethical Aspects 61
- Cost/Availability 61

18. Antenatal Antibody Screening and Intrauterine Transfusion in Pregnancy **62**
Amit Aggarwal
- Antenatal Testing and HDN Status in Developing Countries 62
- Intrauterine Transfusion 63

19. Antenatal Screening of Thalassemia **65**
Reena Das

20. Neonatal Transfusion Practice **67**
A Surekha Devi
- General Recommendations (Fetuses, Neonates, Infants and Children) 67
- Transfusions of Preterm Infants 68
- Neonatal Transfusions 69
- Transfusions in Necrotizing Enterocolitis (NEC) 70
- Transfusions in Extracorporeal Membrane Oxygenation (ECMO) 70

Transfusion Practice in Transplantation

21. Transfusion Practice in Bone Marrow Transplantation and HLA Matching **71**
M Joseph John
- HLA Typing 71
- Transfusion Practices 71
- ABO Incompatibility in BMT: Graft Management 73
- Blood Groups used for Transfusion Support 74

22. Transfusion Practice in Renal Transplants Recipients **76**
Vimarsh Raina, Aseem K Tiwari, Ravi Dara
- Auto-recognition 76
- Allo-recognition 76
- Allograft Rejection 76
- Evolution of Transfusion in Renal Transplantation 77

23. Incompatible Blood Type Kidney Transplantation **81**
Varun Sharma, Priyadarshi Ranjan
- ABO Antigens and Antibodies 81
- History 82
- ABOi-KT Preoperative Management 82
- Use of IVIG 84
- Accommodation 84
- Current Protocol of ABOi-KT 84
- Minimize Immunosuppression 84
- Histological Findings in ABOi-KT 84
- Incidence of Acute Cellular and Antibody Mediated Rejection in ABOi-KT 85
- Adverse Effect of ABOi-KT 85

24. Transfusion Practice in Heart Transplant **87**
Hari Krishan Dhawan
- Pretransplant Work-up 87
- Provision of Leukoreduced Blood Components 87
- Transfusion Requirements during Transplant 87
- Follow-up of Transplant Patients 87
- Role of Photopheresis and Therapeutic Plasma Exchange in Cardiac Transplant Patients 88

25. Transfusion Practice in Liver Transplantation **89**
A Surekha Devi
- Transfusion Predictors 89
- Drugs that Minimize Blood Loss 91
- OLT without Transfusion 92
- Transfusion Support 92

Massive Transfusion

26. Massive Transfusion Protocol **95**
Kanchan Bhardwaj, Rajni Bassi
- Rationale 95
- Definition of Massive Transfusion 95
- Physiology of Hemorrhagic Shock 95
- Coagulopathy of Hemorrhage and Massive Transfusion 96
- Predicting Need for MTP 96
- Adjuncts to MTP 96
- Hypothermia 96
- Rewarming Strategies 96
- Acidosis 98
- Tranexamic Acid 99
- Resuscitation in Patients Requiring Massive Transfusion 99
- Thromboelastography (TEG) and Rotational Thromboelastometry (ROTEM) 99
- Factor rVIIA and MTP 99
- Complications of MTP 99
- MTP after Control of Hemorrhage 100
- MTP in Pediatrics 100

27. Massive Transfusion in Obstetrical Hemorrhage **102**
Sangeeta Pathak
- Principle 102
- Definition 102
- Blood Component Therapy 103
- Recombinant Factor VIIA 104
- Adverse Effects of Massive Transfusion 104

Platelet Therapy

28. Inherited and Acquired Platelet Disorders: Diagnosis and Therapy 108
R Krishnamoorthy
- Methodology 108
- Discussion 108
- Diagnosis 109
- Management 109

29. Transfusion Practice in Dengue 110
BL Bhardwaj, Harnoor Singh Bhardwaj
- Clinical Management 110

30. Fetal and Neonatal Alloimmune Thrombocytopenia 116
Prasun Bhattacharya
- Pathogenesis of FNAIT 116
- Clinical Presentation 116
- Laboratory Investigations 116
- Therapy and Management 117
- Newborns 117

31. Clinicopathological Syndrome in Immune-mediated Heparin-induced Thrombocytopenia 118
P Arumugam
- Pathogenesis 118
- Clinical features 118
- Diagnosis 119
- Management 121
- Prevention 122
- Information to the Patient and Record Keeping 122

32. Single Donor Platelets Versus Random Donor Platelets 123
Rajni Bassi, Ajata Shatru Kapoor
- Preparation of Platelet Concentrate 123
- Random Donor Platelets 123
- Single Donor Platelets/Plateletpheresis 124

33. Prophylactic Platelet Transfusion 126
Poonam Singal
- Transfusion Triggers 126

Apheresis

34. Maximizing the Resources: Multicomponent Collection 129
Prashant Agarwal

35. Therapeutic Plateletpheresis 131
Tulika Chandra
- Therapeutic Plateletpheresis 131

36. Therapeutic Plasma Exchange 133
Aseem K Tiwari
- Plasma Exchange as an Alternative to Immunoglobulin 134

37. Therapeutic Erythrocytapheresis and Leucapheresis 135
Nidhi Mehta
- Plasma Exchange (PE) 135
- Cytapheresis 135

38. Red Cell Exchange in Clinical Practice 137
Joshua Daniel Jeyakumar, Prakash H Muddegowda, Jyothi B Lingegowda
- Red Blood Cell Exchange Technique 137
- Indications of Red Blood Cell Exchange 137
- Sickle Cell Disease 137
- Malaria 138
- Babesiosis 138
- Nitrobenzene and Other Poisonings 138
- Hemolytic Disease of Newborn 138
- Miscellaneous 138

Chronically Transfused Patients

39. Transfusion Practice in Thalassemia 140
Gagandeep Kaur
- Pathophysiology 140
- Transfusion Therapy 140
- Whom to Transfuse 140
- Compatibility Testing 140
- Transfusion Regimen 141
- Transfusion Interval 141
- Characteristics of Blood Products for Transfusion 141
- Effectiveness of Transfusion Therapy 141
- Problem of Thalassemia Transfusion Programs is Developing Countries 142

40. Pediatrician and β-Thalassemia 143
Parveen Mittal
- Road Map 143
- Management 144
- Complications of Thalassemia 144
- Follow-up 145
- Prognosis 145
- Prevention 145
- Prenatal Diagnosis 145

41. Iron Overload in Chronically Transfused Patients: Diagnosis and Treatment 147
Praveen C Sobti, Shruti Kakkar
- Assessment of Iron Overload 147
- Desferrioxamine 149

42. Transfusion in Sickle Cell Anemia 153
Yazdi Italia

43. Advanced Therapies for Treatment of Hemophilia 155
Tarangini D, Anupam Sachdeva
- Advanced Therapies for Hemophilia under Trial 155
- Management of Inhibitors 156
- Management of Hemophilic Arthropathy 156

Intervention in Bleeding Patients

44. Bleeding Disorders: Lab Diagnosis **157**
Mohanvir Kaur, Dinesh Ahluwalia
- General Aspects 157
- Laboratory Investigations 157

45. Management of Coagulopathy in Liver Diseases **162**
Meenu Bajpai
- Defects in Primary Hemostasis 162
- Defects in Secondary Hemostasis 162
- Overview of Management 163

46. Recombinant Activated Factor VII in Clinical Practice **166**
Ravneet Kaur, Kshitija Mittal, Tanvi Sood
- Mechanism of Action 166
- Indications 166
- Off-label Uses 166

47. Plasma Versus Recombinant Clotting Factors **168**
Rajesh C Gopal
- Clotting Factor Concentrate 168
- Demerits of Plasma Factor Concentrates 168

48. Solvent Detergent Treated Plasma in Clinical Use **171**
M Joshua Daniel Jeyakumar, Suryatapa Saha, Prakash H Muddegowda, Prathiba L Pujjita
- Production of SD Plasma 171
- Properties of SD Plasma 171
- Octaplas Follow-up Study 172
- Pharmacoeconomics 172
- Conclusion with European SD Plasma 172

49. Cryoprecipitate **174**
Aradhna Sharma
- Cryoprecipitate Constituents and their Stability 174
- Indications 174
- Common Misuses 174
- Doses and Administration of Factor VIII Concentrates 174
- Preparation, Storage and Quality Control 175
- Pooling of Cryoprecipitate 176
- Potential Adverse Reactions 176

Section 2: CELLULAR THERAPIES

50. Stem Cell Transplantation: Brief Overview **179**
Pankaj Malhotra

51. Stem Cell in Regenerative Medicine: Applications and Cautions **181**
RR Sharma
- Translation of Stem Cell Science into Regenerative Medicine 181
- Threats to Clinical Translation and to the Integrity of Regenerative Medicine 182

52. Stem Cell Therapy in Cardiovascular Diseases **184**
Hamed Bashir, Ajay Bahl, KK Talwar
- Embryonic Stem Cell 184
- Adult Stem Cells 184
- Mechanism of Action of Stem Cells 184
- Types of Cells Contemplated for Cellular Regenerative Therapy 184
- Methods of Stem Cell Delivery 185
- Stem Cell Therapy for Cardiac Repair 185
- Results of Stem Cell Transplant in Clinical Trials 186
- Concerns 187

53. Stem Cell Therapy for Diabetes Mellitus **189**
Rajesh Rajput
- Stem Cell Therapy for Diabetes 190
- Ethical Issues with Use of Stem Cells 191

54. Stem Cell Therapy in Peripheral Artery Disease **193**
Bimal Kumar Agrawal, Mini Bhatnagar Sud
- ABI and Diagnosis of PAD 193
- Stem Cell Therapy for PAD 194
- Clinical Trials on Stem Cell Therapy for PAD 195
- Current Status of Stem Cell Therapy in PAD 196

55. Role of Platelet Rich Plasma in Regenerative Medicine **197**
Kusum K Thakur, Alpna Thakur, Achhar Singh
- Historical Perspective 197
- Basic Science of Platelet Rich Plasma 197
- Platelet Rich Plasma Therapy 198
- Preparation of Platelet Rich Plasma and its Application 198
- Therapeutic Platelet Products 199
- Indications 199
- Contraindications 199
- Safety Profile 199
- Future of Platelet Rich Plasma in Regenerative Medicine 200

56. Role of Platelet Rich Plasma in Plastic Surgery **202**
Umesh Sharma
- Platelet Rich Plasma 202
- Rationale for Use of Platelet Rich Plasma 202
- Platelet Rich Plasma in Plastic Surgery 202
- Safety, Complications, Contraindications to Use of Platelet Rich Plasma 203

57. Cord Blood Banking and Transplantation **204**
Paramjit Dhot

58. Erythropoiesis Stimulating Agents versus Red Cell Transfusion **206**
Sandeep Puri
- Erythropoiesis Stimulating Agents 206
- Red Cell Transfusion 208

59. Natural Killer Cells in Tumor and Transplantation 211
Sunil K Arora, Rajendra Kumar
- Origin and Distribution of Natural Killer Cells 211
- Mechanism of Cytotoxicity 211
- Role of Natural Killer Cells in Transplant Immunology 212
- Natural Killer Cells and Cancer Surveillance 212

60. Potential and Hazards of Gene Therapy 214
Ajit C Gorakshakar
- Historical Aspect 214
- Gene Therapy in Transfusion Medicine 214
- Prerequisite for Gene Therapy 215
- Gene Delivery Systems 215
- Vector Design 215
- Viral Delivery Systems 215
- Nonviral Delivery Systems 215
- Regulatory Issues 216

Section 3: BLOOD SAFETY

61. Leucoreduction 221
Kanchan Bhardwaj
- Approximate Leucocytes in Various Red Blood Cell Preparations 221
- Clinical Indications for Leucoreduction 221
- Methods of Leucodepletion 222
- Adverse Effects of Filtration and Leucodepletion 224
- Universal Leucodepletion versus Selective Leucodepletion 224
- Leucodepletion—Indian Perspective 225

62. Improving Blood Donor Screening by Nucleic Acid Technology 226
Rekha Hans
- Need for Nucleic Acid Technology 226
- Nucleic Acid Technology 226
- Blood Donor Screening 226
- Experiences of Different Countries 227

63. ID-NAT Versus MP-NAT 230
Rajesh Kumar

64. Occult HBV Infection: A Risk for Transfusion 232
Sheetal Malhotra

65. Current Status of Bacterial Detection in Blood Components 236
Mina Sidhu
- Clinical Relevance 237
- Methods to Reduce Risk of Post-transfusion Sepsis 237
- Methods to Detect Bacterial Contamination in Blood Component 237
- Indirect Rapid Bacterial Detection Tests 237
- Direct Methods of Bacterial Detection 238
- Direct Rapid Detection Methods 239
- Pathogen Reduction 239

66. Pathogen Reduction Technology 242
Kanchan Bhardwaj
- Pathogen Inactivation in Platelet Concentrates 242
- Platelet Concentrates with Amotosalen Photochemical Treatment 242
- Riboflavin and Ultraviolet Light Treated Platelets 243
- Methylene Blue Treated Platelets 243
- Pathogen Inactivation in Fresh Frozen Plasma Preparation 243
- Potential System for Pathogen Inactivation in Red Cell Concentrates 243

67. Discarding of Blood and Blood Components 245
Bharat Singh, Preeti Dewakar
- Recommendations 251

68. Adverse Transfusion Reactions 252
Manoj A Kahar
- Classification 252
- Acute Adverse Transfusion Reaction with Immune Causes 252
- Investigations to be Done for Immediate Hemolytic Transfusion Reaction 254
- Acute Adverse Transfusion Reaction with Nonimmune Causes 256
- Delayed Adverse Transfusion Reaction with Immune Causes 257
- Delayed Adverse Transfusion Reaction without Immune Causes 258

69. Hemovigilance and its Launch in India 260
Neelam Marwaha
- Hemovigilance Systems 260
- Outcome of Hemovigilance around the World 260

70. Advances in Serological Assays for Screening Blood Donors for Infectious Agents 264
Paramjit Kaur

Section 4: MISCELLANEOUS

71. The Evidence-based Transfusion Medicine 269
Kulbir Kaur
- Evidence-based Red Blood Cells Utilization Guidelines 270
- Evidence-based Platelet Utilization Guidelines 270
- Evidence-based Fresh Frozen Plasma Utilization Guidelines 271
- Evidence-based Cryoprecipitate Utilization Guidelines 271
- Limitations of Evidence-based Transfusion Medicine 271

72. Blood Bank Accreditation **273**
BK Rana
- Types of Blood Banks/Centres 273
- Scope of Accreditation 273

73. National Plasma Policy for Access to Plasma Derived Proteins for Clinical/Therapeutic Use **278**
Harprit Singh, Shobini Rajan, Shanoo Mishra, Sunil D Khaparde
- Objectives of the Policy 278

74. Ethical Issues in Transfusion Medicine **281**
Kusum K Thakur, Achhar Singh
- International Society of Blood Transfusion Code of Ethics 281
- A Code of Ethics for Blood Donation and Transfusion 281
- Ethical Issues Related to Donors 282
- Ethical Issues Related to Patients 283
- Ethical Issues Related to Blood Establishments 283
- Future Prospectives 283

75. Gel Based Technology: Past, Present and Future **285**
Nidhi Bhatnagar
- Principle of Gel Technology 285
- Practical Applications of Gel Technology 286
- Advantages of Gel Technology 286
- Past, Present and Future 287

76. Automated Blood Grouping and Antibody Screening **288**
Ashish Jain
- Automation in Serologic Testing 288
- Solid-phase Immunoassays 288
- Erythrocyte-magnetized Technology 289
- Validation of Automated Systems 291
- Edge of Automation 291

77. Molecular Genotyping and its Applications to Transfusion Medicine **292**
Swati Kulkarni
- Solving ABO Blood Group Discrepancies 292
- Identification of Weaker and Partial Variants of RhD Gene 293
- RhD Zygosity Testing 293
- Identification of DEL Phenotypes 293
- Prenatal Diagnosis of RhD in Fetus 293
- Antigen Profiling in DAT Positive Cases 294
- Differentiation between Alloantibody and Autoantibody 294
- Quality Control in Reagent Red Cells 294
- Screening for Rare Blood Group Donors 294

78. Rare Blood Group Registry **297**
Swati Kulkarni
- Defining Rare Blood 297
- International Rare Donor Program 297
- National Status 298
- Need for National Registry 298
- Identification of Rare Donors 299
- Methods for Typing Blood Group Types 299
- Future Directions 299

79. New Versus Old Blood **301**
Rimpreet Singh Walia

80. Importance of Safe Blood Administration Practices **305**
Sharad Jain

81. Strategies to Reduce Unnecessary Transfusions **308**
Hemchandra Pandey, Rajendra K Chaudhary

Index *311*
