Contents

1. Ultrasound: Principles and Applications 1
Ashok Khurana

- Getting Started *1*
- Physics of Transducer Choice *1*
- Resolution *2*
- How and Why Knobs that should be used often, should be used *3*
- Doppler Studies *5*
- 3D and 4D Ultrasound *10*
- Safety of Ultrasound *12*
- Cleaning and Disinfecting the Probes *13*
- Cleaning and Maintaining the Probe *13*
- Disinfecting the Probe *13*

2. Pelvic Assessment: Examination Technique and Normal Anatomy 15
Lil Valentin

- Gynecological Ultrasound Examination: Optimization of the Ultrasound Image, Image Orientation, and Examination Technique *15*
- Transvaginal Ultrasound Examination *18*
- Transrectal Examination *22*
- Transabdominal Gynecological Ultrasound Examination *22*
- Normal Ultrasound Morphology of the Uterus and Ovaries in Women of Fertile Age *23*
- Normal Ultrasound Morphology of Uterus and Ovaries in Postmenopausal Women *26*
- Urinary Bladder *27*
- Pouch of Douglas *27*
- Doppler Ultrasound Examinations of Normal Uterus and Ovaries *27*

3. Uterine Fibroids, Adenomyosis, and Congenital Uterine Anomalies 29
Janine Elson, Giuseppina Lamanna

- Ultrasound of the Uterus *29*
- Imaging Methods *29*
- Uterine Fibroids or Myomas *31*
- Adenomyosis *35*
- Congenital Uterine Anomalies *37*
- Clinical Cases *40*

4. Assessment of Uterine Cavity 43
Jane Stewart

- Endometrial Cavity on Ultrasound Scan *43*
- Abnormalities of the Endometrium *48*
- Structural Abnormalities of the Uterus *51*
- Reporting Endometrial Findings on Ultrasound Scanning of the Uterus *55*
- Other Ultrasound Modalities *55*

5. Evaluation of Tubes 61
Sonal Panchal

- Anatomy of the Fallopian Tubes *61*
- Tubal Evaluation *62*
- Diagnosis of Tubal Pathologies by Ultrasound *62*
- Tests of Tubal Patency Assessment *66*

6. Assessment of Ovarian Reserve 79
Kannamannadiar Jayaprakasan

- Ovarian Reserve Tests *80*
- Ultrasound Markers 80
- Ovarian Volume 80
- Antral Follicle Count 82
- Ovarian Blood Flow 86

7. Ovarian Pathology 92
Ouma Pillai, Kamal Ojha

- How to Scan and Look for Ovaries? *92*
- Normal Physiology *92*
- Corpus Luteum *93*
- Functional Ovarian Cyst *95*
- Polycystic Ovarian Syndrome *95*
- Hyperstimulated Ovaries *97*
- Ovarian Torsion *98*
- Cystadenoma *99*
- Endometrioma *99*
- Cystic Teratoma *100*
- Malignant Ovarian Pathologies *100*
- Borderline Ovarian Tumors *102*

8. Pelvic Endometriosis and Adnexal Pathologies 105
Narendra Malhotra, Jaideep Malhotra, Sonal Panchal

- Endometriosis *105*
- Diagnostic Modalities *105*
- Role of Ultrasound *105*
- Types of Endometriotic Lesions *106*
- Adnexal Pathologies *112*

9. Ultrasound Monitoring of Natural and Stimulated Cycles 115
Sonal Panchal

- Monitoring a Natural Cycle *115*
- Monitoring of Stimulated Cycles *118*

10. Ultrasound-Guided Procedures in Assisted Reproduction **132**
Chaitanya Nagori

- Oocyte Retrieval *132*
- Embryo Transfer *136*
- Cyst Aspirations *140*
- Aspiration of Hydrosalpinx *141*
- Aspiration of Ascitic Fluid in OHSS *141*
- Fetal Reduction *141*

11. Assessing Complications of Assisted Reproduction Treatment **147**
Miriam Baumgarten, Lukasz Polanski

- Fertility Treatment Background *147*
- Stimulation Complication *147*
- Complications of Oocyte Retrieval *151*
- Multiple Pregnancies *153*
- Ectopic Pregnancy *157*

12. Application of Ultrasound in Evaluation of Male Infertility **162**
S Boopathy Vijayaraghavan, G Swapna

- Sonography of Scrotum *162*
- Transrectal Ultrasonography *163*
- Nonobstructive Causes of Male Infertility *164*
- Obstructive Causes of Male Infertility *174*
- Role of Ultrasound in Assisted Reproduction *188*

13. Three-Dimensional Ultrasound in Subfertility **191**
Kannamannadiar Jayaprakasan, Nick Raine-Fenning

- Three-Dimensional Ultrasound *191*
- Application of Three-Dimensional Ultrasound in Subfertility *197*

Index *209*
